**The American Colonies and the British Empire, 1607-1783, Part II vol 6** Steven Sarson,Jack P Greene,2020-04-13

This second part of an eight volume reset edition traces the evolution of imperial and colonial ideologies during the British colonization of America It covers the period from 1764 to the end of the American Revolutionary War in 1783 [The New Learned History](#),1922 [Behold Your King](#) Anthony Robert Pettersson,2009-12-10 This book investigates the nature of the hope for the house of David in the final form of the book of Zechariah It focuses particularly on the following themes the roles of Joshua and Zerubbabel the nature and identity of the Shoot the coming King the Shepherd and the Pierced One It challenges the scholarly consensus going back to the thesis of Julius Wellhausen that the high priest took over the role and prerogatives of the pre exilic monarch in the early post exilic period Instead Zechariah merely envisages Joshua the high priest being reinstated to the temple duties that were undertaken before the exile Furthermore Zechariah does not identify Zerubbabel as the promised future Davidic king Shoot Rather Zechariah demonstrates a hope for the restoration of a Davidic king who will have a key role in temple building after the time of Zerubbabel The belief that Zechariah 9 11 and 12 14 are oracles that seek to reinterpret prophecies that have become problematic is also challenged There is no strong evidence that the hope for the house of David in Zechariah 9 14 contradicts the presentation of Zechariah 1 8 This thesis shows how these later chapters continue and develop many of the themes related to the Davidic hope in Zechariah 1 8 The picture of the Davidic hope that emerges from the book of Zechariah is consistent with the expectations of earlier prophets and confirms that the book when read as a whole provides a strong impetus for later messianism in the post exilic period [Across Currents: Connections Between Atlantic and \(Trans\)Pacific Studies](#) Nicole Poppenhagen,Jens Temmen,2020-04-28

This book explores connections between Atlantic studies and trans Pacific studies including the potential discursive topical and historical overlaps of the two fields It carves out mutual concerns and theoretical affinities but also divergent approaches and differences While acknowledging the fundamental differences that characterize the individual fields the essays in this volume examine how both Atlantic and trans Pacific studies are part of global currents of political activist artistic economic and academic exchange This volume brings together voices from Europe North America and the Pacific with disciplinary backgrounds in history culture and literature Directed at scholars with a background in trans Pacific and or Atlantic studies this collection is an attempt to stimulate exchange between the two fields to intensify their impact within the current transnational focus of literary and cultural studies to encourage the questioning of well mapped paths of inquiry and to outline new theoretical approaches to both fields This book was originally published as a special issue of the journal Atlantic Studies [Hitchcock's New and Complete Analysis of the Holy Bible](#) Nathaniel West,1871 [Conservation Biology](#) Fred Van Dyke,2008-02-28 Fred Van Dyke s new textbook Conservation Biology Foundations Concepts Applications 2nd Edition

represents a major new text for anyone interested in conservation Drawing on his experience as a conservation biologist college teacher and successful textbook author Van Dyke's organizational clarity and readable style make this book an invaluable resource for students in conservation around the globe Presenting key information and well selected examples this student friendly volume carefully integrates the science of conservation biology with its implications for ethics law policy and economics In addition to rigorous examination of the scientific theory supporting conservation biology and its applications this unique book includes a number of features which set it apart from others These include its chapters on aquatic conservation landscape ecology and ecosystem management and its direct explanation and invitation to students on how to enter the work of conservation as a professional and personal vocation Aimed primarily at undergraduates studying courses in conservation and conservation biology this book will also be useful to practicing conservationists and natural resource managers
