**Carbon Queen** Maia Weinstock,2023-03-07 The life of trailblazing physicist Mildred Dresselhaus who expanded our understanding of the physical world As a girl in New York City in the 1940s Mildred Millie Dresselhaus was taught that there were only three career options open to women secretary nurse or teacher But sneaking into museums purchasing three cent copies of National Geographic and devouring books on the history of science ignited in Dresselhaus 1930 2017 a passion for inquiry In Carbon Queen science writer Maia Weinstock describes how with curiosity and drive Dresselhaus defied expectations and forged a career as a pioneering scientist and engineer Dresselhaus made highly influential discoveries about the properties of carbon and other materials and helped reshape our world in countless ways from electronics to aviation to medicine to energy She was also a trailblazer for women in STEM and a beloved educator mentor and colleague Her path wasn't easy Dresselhaus's Bronx childhood was impoverished Her graduate adviser felt educating women was a waste of time But Dresselhaus persisted finding mentors in Nobel Prize winning physicists Rosalyn Yalow and Enrico Fermi Eventually Dresselhaus became one of the first female professors at MIT where she would spend nearly six decades Weinstock explores the basics of Dresselhaus's work in carbon nanoscience accessibly and engagingly describing how she identified key properties of carbon forms including graphite buckyballs nanotubes and graphene leading to applications that range from lighter stronger aircraft to more energy efficient and flexible electronics

[Optical Technology Transfer and Innovation in Ophthalmic Imaging](#) Barry R. Masters,2025-10-30 This book presents a new view of symbiotic technology transfer between different fields in the optical sciences For example adaptive optics were initially developed for military research programs seeking to correct the effects of atmospheric fluctuations on telescopes The technology was subsequently transferred to optical microscopes and then finally used in ophthalmic imaging devices to image photoreceptors in the living human retina This book examines various recent and historical technology transfers among the optical sciences and attempts to answer the following questions What are the mathematical and the physical foundations of these technology advances What events and influences military requirements new journals new funding sources the internet etc made the technologies and their transfer possible What was the impact of technology transfer on the development of optical science What role did the human eye and visual system play in technology development This book examines how innovations propagate from one field to another illustrating the benefits of cross disciplinary collaboration This book is about curiosity skepticism innovation and creativity in science and technology and explores practices that advance innovation and those that inhibit innovation Analyses of some selected pertinent case studies highlight the roles of unique individuals who were able to make the journey from initial concept to widespread clinical acceptance of their instruments What are the common factors of their education experiences and approaches that resulted in their inventions and innovations This book is intended to inspire and encourage those who dream of advancing the diagnostics and the treatment of diseases through new medical devices It also addresses

budding startup dreamers venture capitalists research directors and funding agency administrators by providing new insights into practices that promote and inhibit innovation This book should be of interest to scientists and researchers in many fields of optics as well as technical policy makers at funding institutions     **Atkinson's Evening Post, and Philadelphia Saturday News** ,1928 SCC Library has 1974 89 plus scattered issues     Science Fiction Cinema Christine Cornea,2007-06-06 This major new study offers a broad historical and theoretical reassessment of the science fiction film genre The book explores the development of science fiction in cinema from its beginnings in early film through to recent examples of the genre Each chapter sets analyses of chosen films within a wider historical cultural context while concentrating on a specific thematic issue The book therefore presents vital and unique perspectives in its approach to the genre which include discussion of the relevance of psychedelic imagery the new woman of science generic performance and the prevalence of techno orientalism in recent films While American films will be one of the principle areas covered the author also engages with a range of pertinent examples from other nations as well as discussing the centrality of science fiction as a transnational film genre Films discussed include The Day the Earth Stood Still The Body Snatchers Forbidden Planet The Quatermass Experiment 2001 A Space Odyssey Demon Seed Star Trek The Motion Picture Star Wars Altered States Alien Blade Runner The Brother from Another Planet Back to the Future The Terminator Predator The One Dark City The Matrix Fifth Element and eXistenZ Key Features Thematically organised for use as a course text Introduces current and past theories and practices and provides an overview of the main themes approaches and areas of study Covers new and burgeoning approaches such as generic performance and aspects of postmodern identity Includes new interviews with some of the main practitioners in the field Roland Emmerich Paul Verhoeven Ken Russell Stan Winston William Gibson Brian Aldiss Joe Morton Dean Norris and Billy Gray     **The English Catalogue of Books ....: 1801-1836.
