## **Minimalist Wilderness Rigging**

Pat Rhodes,2019-10-16 Minimalist Wilderness Rigging is the third volume of A Practitioner's Study series This book is a continuation of the first two volumes About Rope Rescue Rigging and Insights Into Confined Space Rescue The primary focus of this book is the wilderness environment and the advanced rigging skills needed to attempt a rescue in this harsh domain Wilderness rigging specific to rope rescue has always been the ancestor to what we might consider today as modern NFPA driven fire rescue rope rigging How ironic that we go back to many of those ancestral rigging roots to address new modern day rescue challenges most notably REMS Rapid Extraction Module Support designed as a command component for rescuing

wildland firefighters and the time honored traditions of wilderness search and rescue teams The common thread with all aspects of wilderness rescue is that there is usually not an abundance of immediate advanced medical and rescue support As such standard fire rescue rope rescue equipment will most likely not be available These challenging factors mandate that the limited few rescuers attempting a wilderness rope rescue need to be at the top of their game when it comes to minimalist rigging

**Insights Into Confined Space Rescue: A Practitioner** Pat Rhodes, 2018-10 There are numerous high quality training manuals on the market today that address the typical OSHA driven requirements for confined space rescue It was never my intent to write an additional one This book is simply my sharing of perceptions on a few confined space considerations that I have personally encountered during my career of rescue work in and around the confined space environment It should also be noted that this book is an extension of my previous book *A Practitioner's Study About Rope Rescue Rigging* I have included some direct rigging information from the *Practitioner's Study About Rope Rescue Rigging* and in a few instances such as the sections addressing knot craft and highlines I have added changes and or improvements to the rigging practices that are directly taken from the *Practitioner's Study* My prime central belief in the confined space realm is never become complacent Confined space work must be researched calculated and absolutely accountable Ultimately I would say my most important central foundation in this world of rescue is study and practice daily as much as possible ongoing and never ending These considerations are the driving force behind this book It would be foolhardy for me to attempt a publication that claims to have all the answers for confined space rescue However I can share with you some of my personal experiences favorite knots and evolving rigging concepts in hopes that you may find some bit of information that you can use and possibly add to your bag of tricks Pat Rhodes
