Connecting Children with Classics Meagan Lacy, Pauline Dewan, shady radical, 2018-03-14 This guide identifies hundreds of books that can help children develop into engaged readers. Children's librarians collection development specialists in public libraries as well as K-8 school librarians and teachers will choose from the best in children's titles. This unique readers advisory and collection development guide for librarians and others who work with children focuses on readers and their needs rather than simply categorizing books by their characteristics and features as traditional literature guides do. Taking this unusual perspective brings forth powerful new tools and curricular ideas on how to promote the classics and how to best engage with young readers and meet their personal and emotional needs to boost interest and engagement. The guide identifies seven reader driven appeals or themes that are essential to successful readers advisory awakening new perspectives providing models for identity offering reassurance comfort strength and confirmation of self worth connecting with others giving courage to make a change facilitating acceptance and building a disinterested understanding of the world. By becoming aware of and tapping into these seven themes librarians and other educators can help children more deeply connect with books thereby increasing the odds of becoming lifelong readers. The detailed descriptions of each book provide plot summaries as well as notes on themes subjects reading interest levels adaptations and alternative formats translations and read alikes. This informative guide will also aid librarians in collection development and bibliotherapy services.

A Bibliography of Modern Arthuriana (1500-2000) Ann F. Howey, Stephen Ray Reimer, 2006 Annotated bibliography of the Arthurian legend in modern English language fiction not only in literary texts but in television, music and art. The legend of Arthur has been a source of fascination for writers and artists in English since the fifteenth century when Thomas Malory drew together for the first time in English a variety of Arthurian stories from a number of sources to form the *Morte Darthur*. It increased in popularity during the Victorian era when after Tennyson's treatment of the legend not only authors and dramatists but painters, musicians and film makers found a source of inspiration in the Arthurian material. This interdisciplinary annotated bibliography lists the Arthurian legend in modern English language fiction from 1500 to 2000 including literary texts, film, television, music, visual art and games. It will prove an invaluable source of reference for students of literary and visual arts, general readers, collectors, librarians and cultural historians indeed by anyone interested in the history of the ways in which Camelot has figured in post medieval English speaking cultures.

ANN F. HOWEY is Assistant Professor at Brock University, Canada. STEPHEN R. REIMER is Associate Professor at the University of Alberta, Canada.
