Bioactive Natural Products Detection, Isolation, and Structural Determination Steven M. Colegate, Russell J. Molyneux, 1993-09-29 Bioactive Natural Products covers all the aspects of bioactive natural product research from ethnobotanical investigations to modern technologically assisted isolation and structural determination of active compounds An internationally selected group of experts share their knowledge of a wide range of bioactivities and chemical compound classes Topics in the chapters describing the modern application of detection isolation and structural determination techniques are strongly supported by chapters detailing and reviewing research involving various classes of bioactivity Research areas include the immunomodulatory antiviral cytotoxic anti inflammatory and insect behavior classes of bioactivity Extensive referencing throughout the text is helpful to those readers not familiar with this subject and serves as a critical review for more experienced researchers The book is also excellent for upper division or post graduate courses **Annual Reports on the Progress of Chemistry Vol. 96** ,2000 *Bulletin of Magnetic Resonance* ,1988 **NMR at Very High Field** J.B. Robert, 1991-01-14 In recent years several improvements have been made in the manufacturing of resistive superconducting and hybrid mag nets Condensed matter physicists are nowadays doing experiments in steady magnetic fields of up to 30 Tesla But the field homogeneity B required in a volume of the order of a few cm is usually several orders of magnitude less severe than the one which is needed for high resolution NMR Over the last 30 years with each generation of new high resolution NMR spectrometers from 100 MHz up to 600 MHz taking advantage of the increase in sensitivity and resolution new areas of research have been opened in chemistry physical chemistry and biochemistry The generation of the 20 Tesla superconducting magnets is coming Thus one may seriously start to consider high resolution NMR at 1 GHz The purpose of this volume is to examine some of the advantages which can be obtained at such high frequencies and some of the problems we shall be facing An important aspect of NMR at high field which is not presented in this volume concerns the design of the magnet The building of a superconducting magnet producing a field 10 3 higher than 20 T with a field
