

## How to Make a Rainbow

White light that comes from the sun or a flashlight is made up of different colors of light: red, orange, yellow, green, blue, indigo, and violet. To make a rainbow, white light must be slowed down and bent.

### White Light Entering a Water Droplet

White light entering a water droplet, or slows down and bends (refracts). As the light enters the water droplet, each color bends at slightly different angles. The light then reflects off the back of the droplet and then bends again as it leaves the droplet. This causes the white light to separate into the spectrum of colors: red, orange, yellow, green, blue, indigo, and violet.

### Light Entering a Prism

White light enters a prism.
