Doing Honest Work in College, Third Edition Charles Lipson,2019-01-25 Doing Honest Work in College stands on three principles do the work you say you do give others credit and present your research fairly These are straightforward concepts but the abundance of questionable online sources and temptation of a quick copy paste can cause confusion as to what s considered citing and what s considered cheating This guide starts out by clearly defining plagiarism and other forms of academic dishonesty and then gives students the tools they need to avoid those pitfalls This edition addresses the acceptable use of mobile devices on tests the proper approach to sources such as podcasts or social media posts and the limitations of citation management software

Protestant Missions and Local Encounters in the Nineteenth and Twentieth Centuries Hilde Nielssen,Inger Marie Okkenhaug,Karina Hestad-Skeie,2011-07-27 This book makes visible an important but neglected aspect of Christian missions its transnational character Missionaries considered themselves global actors yet they operated within a variety of nation states The volume demonstrates how processes on a national level are closely linked to larger

transnational processes *Christianity for Young Intellectuals* Robert Klitgaard,2024-08-23 If you're like many young intellectuals Christianity may seem quaint at best or even a sign of an anti-intellectual worldview. The doors of your mind and heart may shut prematurely. If so, this anthology may blow those doors open wide. Some of the world's most intriguing authors appear here often in essays without wide circulation. They tackle big, often unspoken questions that resonate deeply. What if you could figure out everything, then what? Where do both science and the humanities stop short? What is a truly fulfilled life? Several chapters describe Jesus's profound impact on history and philosophy. Many signs point to something more. What might it mean to say that it is Jesus? This collection isn't about converting minds but energizing them a set of intellectual calisthenics designed to invigorate and strengthen your academic and personal development.

Tom Crean Michael Smith, 2003-03-14 Tom Crean ran away from his Kerry home aged 15 to join the British navy in 1893. He travelled to the Antarctic with the famous explorers Scott and Shackleton. He explored the unknown, crossed ice fields and wild oceans, and courageously saved friends from death.

Who's who in the West, 1960 Phenomenology and the Philosophy of Technology Bas de Boer, Jochem Zwier, 2024-10-16 Our contemporary world is undeniably intertwined with technology, influencing every aspect of human life. This edited volume delves into why modern philosophical approaches to technology closely align with phenomenology and explores the implications of this relationship. Over the past two decades, scholars have emphasized users' lived experiences and their interactions with technological practices, arguing that technologies gain meaning and shape within specific contexts, actively shaping those contexts in return. This book investigates the phenomenological roots of contemporary philosophy of technology, examining how phenomenology informs analyses of temporality, use, cognition, embodiment, and environmentality. Divided into three sections, the volume begins by exploring the role of phenomenological methods in the philosophy of technology and further investigates the methodological implications of combining phenomenology with other philosophical schools. The second section examines technology as a phenomenon, debating whether it should be analysed as a whole or through individual artifacts. The final section addresses the practical applications of phenomenological insights in design practices and democratic engagement. By offering a systematic exploration of the connection between phenomenology and technology, this volume provides valuable insights for scholars, students, and researchers in related fields, highlighting the continued relevance of phenomenological perspectives in
