Former editor of American Archivist, the journal of the Society of American Archivists, SAA Hunter covers such keystone topics as a history of archives including the roles of historical societies and local history collections in libraries; new sections on community archives, diversity and inclusion; conducting a survey and starting an archival program; selection, appraisal, acquisition, accessioning and deaccessioning; important points of copyright, privacy and ethics; arrangement of archival collections with a discussion of new theories; description including DACS, EAD and tools such as ArchivesSpace; access, reference and outreach with a look at how recent innovations in finding aids can help researchers; preservation including guidance on how to handle rare books, maps, architectural records and artifacts; digital records addressing new and popular methods of storage and preservation of email, social media, image files, webpages, Word documents, spreadsheets, databases and media files; disaster planning; security and theft prevention; metrics assessment; establishing employee procedures and policies; working with interns and volunteers and other managerial duties; public relations and marketing from social media and the Web to advocacy and professional guidelines and codes such as the newly developed SAA Statement of Core Values of Archivists. Providing in-depth coverage of both theory and practice, this manual is essential for archivists at all levels of experience and of all backgrounds.
