### Description

The Electric Manual Pull Station is a high-quality, die-cast metal, dual action fire alarm pull station available with a SPST, DPST or DPDT switch with terminal strip connections. The contacts are rated for 1 Amp at 30 VDC. Gold plating on the contacts avoid the risk of corrosion. All models in the series have been tested by UL for compliance to the latest requirements of the American with Disabilities Act (ADA).

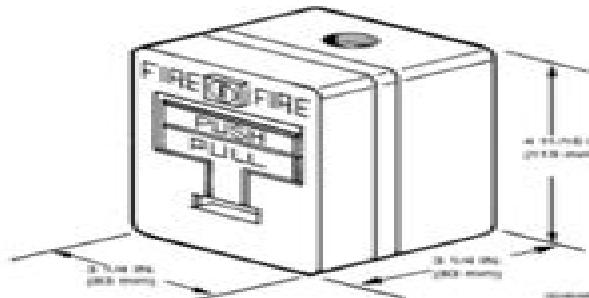

The Electric Manual Pull Station is operated by pushing in the top bar and pulling the handle on the front of the station as far down as it will go. At this point, the handle locks into place and is easily visible from up to 50 ft. (15 m). Opening the station with the key, placing the handle in the normal upright position and re-locking the station resets the pull station.

The addressable ready pull station comes with a bracket on the back for securing the FMM-101 Mini Monitor Module, Part No. 4285098 (sold separately). The terminal block provides clamping plates for easy connection to the SLC loop and N.O. switch contacts. An end-of-line resistor for the AUTOPIULSE IQ-301 and AUTOPIULSE IQ-396X is factory installed across the switch contacts.
