Answers

Topics

- A. The period of European history at the close of the middle Ages and the rise of the modern world; a cultural rebirth from the 14th through the middle of the 17th centuries. Some characteristics are art, science, math, and religion.
- B. In Italy there were architectural remains, statues, coins, and in scriptures. A wealthy and powerful merchant class further promoted the cultural rebirth. These merchants exerted both political and economic leadership. They stressed education and individual achievement. They also spent lavishly to support the arts.
- C. Italian artists focused on perspective. They incorporated humanist concerns (individual achievement). Also tried to make their paintings very realistic. Also incorporated religious figures in their drawings.
- D.
- E. Details were very important. Greater emphasis on intense religious feeling. They were devotional to art.
- F. Intellectual movement at the heart of the Italian Renaissance that focused on worldly subjects rather than on religious issues. It focused on the individual potential and secularism. They stressed the study of liberal arts: grammar, rhetoric, poetry, ethics, and history. The most important humanists were Erasmus and More.
- G. People looked to the past for models. Humanists turned to ancient classical ideas. Religious reformers were inspired by the bible and early Christian times. The leading theory was the heliocentric theory introduced by Copernicus. Many experts didn't believe the new theory because all scientific knowledge and many religious thinkings were based on arguments developed by classical thinkers. Most experts rejected his heliocentric theory, for if he was right, the whole system of human knowledge might have been called into question. Galileo was one of the famous people during the scientific revolution. He supported Copernicus's heliocentric belief. Another famous thinker was Newton, who proposed that a single force keeps planets in orbit around the sun: gravity.
