

All answers should go inside the **RED BOXES**.

Name: _____

Date: _____

Student Exploration: Covalent Bonds

Vocabulary: covalent bond, diatomic molecule, Lewis diagram, molecule, noble gases, nonmetal, octet rule, shell, valence, valence electron

Prior Knowledge Questions (Do these **BEFORE** using the Gizmo.)

1. There are eight markers in a full set, but Flora and Frank each only have seven markers. Flora is missing the red marker, and Frank is missing the blue marker.

What can they do so that each has a full set of markers?

2. Otto and Olivia each have six markers. Otto is missing the purple and green markers, and Olivia is missing the black and brown markers. What can they do so that each has a full set?

Gizmo Warm-up

Just like the students described above, **nonmetal** atoms can share electrons. As you will see in the *Covalent Bonds* Gizmo, atoms form bonds in this way.

To begin, check that **Fluorine** is selected from the **Select a substance** menu. Click **Play** () to see the electrons orbiting the nucleus of each atom.

1. The outermost electrons in each atom are called **valence electrons**. How many valence electrons does each fluorine atom have?

2. Click **Pause** (). Drag an electron from the left atom to the right atom. Click **Play**. What happens?

3. Click **Pause**, drag an electron from the right atom to the left, and then click **Play**. What happens now?

Computational Approaches for Chemistry Under Extreme Conditions Nir Goldman, 2019-02-18 This book presents recently developed computational approaches for the study of reactive materials under extreme physical and thermodynamic conditions. It delves into cutting edge developments in simulation methods for reactive materials including quantum calculations spanning nanometer length scales and picosecond timescales to reactive force fields, coarse grained approaches and machine learning methods spanning microns and nanoseconds and beyond. These methods are discussed in the context of a broad range of fields including prebiotic chemistry in impacting comets, studies of planetary interiors, high pressure synthesis of new compounds and detonations of energetic materials. The book presents a pedagogical approach for these state of the art approaches compiled into a single source for the first time. Ultimately the volume aims to make valuable research tools accessible to experimentalists and theoreticians alike for any number of scientific efforts spanning many different types of compounds and reactive conditions.

Biology: How Life Works (Volume 1) James Morris, 2013-01-04 Ordinarily textbooks are developed by first writing chapters, then making decisions about art and images, and finally once the book is complete assembling a test bank and ancillary media. This process dramatically limits the integration across resources and reduces art, media and assessments to ancillary material rather than essential resources for student learning. **Biology: How Life Works** is the first project to develop three pillars: the text, the visual program, and the assessment at the same time. All three pillars were developed in parallel to make sure that each idea is addressed in the most appropriate medium and to ensure authentic integration. These three pillars are all tied to the same set of core concepts, share a common language, and use the same visual palette. In this way, the text, visual program, and assessments are integral parts of student learning rather than just accessories to the text.

Essential Oil Extraction, Scalability Concerns, and Process Intensification Abiola Ezekiel Taiwo, Olalere Olusegun Abayomi, Bernardo Castro Dominguez, 2025-12-05 This book provides insights into essential oil extraction research with a special interest in the scalability concerns of each extraction method and their techno-economic concerns. It includes advancements and prognosis for the optimal extraction of essential oils from laboratory to pilot then to industrial scale. It overviews and identifies sustainable options and proposes improvements to the currently available technologies in essential oil extraction. Features: Focuses on extraction technology of essential oils and scalability concern of essential oil extraction. Presents robust elucidation on essential oil production, current market value and demand. Reviews feasibility studies and consideration of essential oil production processes. Recent advancements in oil extraction methodologies and process intensification techniques for optimizing nutraceutical recovery. Emphasizes process optimization, control parameters, and addresses environmental sustainability concern in essential oil extraction. This book is aimed at graduate students, researchers, and professionals in separation and purification processes, process intensification, and agricultural feedstocks.

Educators Guide to Free Internet Resources Educators Progress Service, 2005-04 To provide our

customers with a better understanding of each title in our database we ask that you take the time to fill out all details that apply to each of your titles Where the information sheet asks for the annotation we ask that you provide us with a brief synopsis of the book This information can be the same as what may appear on your back cover or an entirely different summary if you so desire *Introduction to Modern Inorganic Chemistry* Kenneth Malcolm Mackay, Rosemary Ann Mackay, 1989 *The Software Encyclopedia 2001* , 2001 **The Canadian Mining and Metallurgical Bulletin** , 1928

Prentice Hall Science Explorer Michael J. Padilla, 2002 Chemistry in the Community , 1995 The Origins of Evolutionary Innovations Andreas Wagner, 2011-07-14 The history of life is a nearly four billion year old story of transformative change This change ranges from dramatic macroscopic innovations such as the evolution of wings or eyes to a myriad of molecular changes that form the basis of macroscopic innovations We are familiar with many examples of innovations qualitatively new phenotypes that provide a critical benefit but have no systematic understanding of the principles that allow organisms to innovate This book proposes several such principles as the basis of a theory of innovation integrating recent knowledge about complex molecular phenotypes with more traditional Darwinian thinking Central to the book are genotype networks vast sets of connected genotypes that exist in metabolism and regulatory circuitry as well as in protein and RNA molecules The theory can successfully unify innovations that occur at different levels of organization It captures known features of biological innovation including the fact that many innovations occur multiple times independently and that they combine existing parts of a system to new purposes It also argues that environmental change is important to create biological systems that are both complex and robust and shows how such robustness can facilitate innovation Beyond that the theory can reconcile neutralism and selectionism as well as explain the role of phenotypic plasticity gene duplication recombination and cryptic variation in innovation Finally its principles can be applied to technological innovation and thus open to human engineering endeavours the powerful principles that have allowed life s spectacular success

Nanomaterials in Bionanotechnology Ravindra Pratap Singh, Kshitij RB Singh, 2021-08-17 Nanomaterials in Bionanotechnology Fundamentals and Applications offers a comprehensive treatment of nanomaterials in biotechnology from fundamentals to applications along with their prospects This book explains the basics of nanomaterial properties synthesis biological synthesis and chemistry and demonstrates how to use nanomaterials to overcome problems in agricultural environmental and biomedical applications Features Covers nanomaterials for environmental analysis and monitoring for heavy metals chemical toxins and water pollutant detection Describes nanomaterials based biosensors and instrumentation and use in disease diagnosis and therapeutics Discusses nanomaterials for food processing and packaging and agricultural waste management Identifies challenges in nanomaterials based technology and how to solve them This work serves as a reference for industry professionals advanced students and researchers working in the discipline of bionanotechnology
