

Nature vs. Nurture

Nature vs Nurture is a debate between scientists about what makes people who they are. Some people believe that we are born with certain traits and abilities, while others believe that we are shaped by our environment. Both of these ideas have a lot of evidence behind them, but it's difficult to know for sure which one is right. In this article, we'll explore both sides of the debate and see what the science has to say about it.

One side of the debate is the idea that some people are born with certain traits and abilities, while others are not. This is the idea of "nature" and it has a lot of evidence behind it. For example, some people are born with a higher IQ than others, and some people are born with a higher level of athleticism than others. These traits are passed down from our parents and are not something that we can change. On the other hand, some people are born with a higher level of emotional stability than others, and some people are born with a higher level of social skills than others. These traits are also passed down from our parents, but they are not as easily measurable as IQ or athleticism.

On the other side of the debate is the idea that we are shaped by our environment. This is the idea of "nurture" and it also has a lot of evidence behind it. For example, some people who were born with a lower IQ than others end up with a higher IQ because of the education they receive. Some people who were born with a lower level of athleticism than others end up with a higher level of athleticism because of the sports they play. These traits are not passed down from our parents, but they are shaped by our environment. In fact, some people who were born with a higher level of emotional stability than others end up with a lower level of emotional stability because of the stress they experience in their lives.

So, what's the answer? The truth is, it's a bit of both. Some people are born with certain traits and abilities, but they are also shaped by their environment. For example, a person who is born with a high IQ might not reach their full potential if they don't have access to a good education. On the other hand, a person who is born with a lower IQ might be able to reach their full potential if they have access to a good education. The same is true for athleticism and emotional stability. The environment plays a big role in shaping who we are, but it's not the only factor.

Conclusion

The debate between nature and nurture is a complex one, and it's difficult to know for sure which one is right. However, it's clear that both of them play a role in shaping who we are.

The Science of Being Angry Nicole Melleby, 2022-05-10 From the acclaimed author of Hurricane Season an unforgettable story about what makes a family for fans of Hazel's Theory of Evolution and Ivy Aberdeen's Letter to the World Eleven year old Joey is angry All the time And she doesn't understand why She has two loving moms a supportive older half brother and as a triplet she's never without company Her life is good But sometimes she loses her temper and lashes out like the time she threw a soccer ball hard at a boy in gym class and bruised his collarbone Or when jealousy made her push her former best friend and crush Layla a little bit too roughly After a meltdown at Joey's apartment building leads to her family's eviction Joey is desperate to figure out why she's so mad A new unit in science class makes her wonder if the reason is genetics Does she lose control because of something she inherited from the donor her mother chose

The Science of Being Angry is a heartwarming story about what makes a family and what makes us who we are

Social Inequality Heather M. Fitz Gibbon, Anne M. Nurse, Charles E. Hurst, 2019-07-02 Like past editions this tenth edition of Social Inequality Forms Causes and Consequences is a user friendly introduction to the study of social inequality This book conveys the pervasiveness and extensiveness of social inequality in the United States within a comparative context to show how inequality occurs how it affects all of us and what is being done about it This edition benefits from a variety of changes that have significantly strengthened the text The authors pay increased attention to disability intersectionality immigration religion and place This edition also spotlights crime and the criminal justice system as well as health and the environment

The tenth edition includes a new chapter on policy alternatives and venues for social change The "(no) negative evidence" problem: Nativist and social interactionist views on how children recover from grammatical errors Bünyamin Yuvarlak, 2021-03-23 Seminar paper from the year 2019 in the subject English Language and Literature Studies Linguistics grade 1 3 University of Bonn Institut für Anglistik Amerikanistik und Keltologie course Language Acquisition Psycholinguistik language English abstract This paper aims at exploring how the views on language acquisition have developed over time where they conflict each other and whether it is possible to position oneself on either side The nature vs nurture debate is an everlasting discussion not only in the area of linguistics but science in general This is what makes it particularly interesting because there is always new information to expect Furthermore it is an issue not limited to academic discourse only but one that appears in everyday conversation An interesting aspect of language acquisition more specifically the knowledge of language is the question if children arrive at such knowledge by the mere exposure to positive evidence i.e. the language of adults they are surrounded with or if negative evidence also has an impact i.e. children's knowledge of language is based on explicit or implicit feedback to whether an utterance was in some way incorrect The two terms will be defined and looked into in more detail in the second chapter In the following the correlation between the nature vs nurture debate and language acquisition will be explained first The respective chapter provides a brief insight into how the nativist approach developed mainly based on Chomsky's 1988 notion of Universal Grammar UG and the type of criticism it brought along It further explains the connection between the respective theories and the grammatical aspect of language acquisition In the last section the main problems of experience based language learning will be displayed and defined The third chapter starts with a section dedicated to where the particular view that humans need innate structures for a correct knowledge of language stems from It continues with a detailed look on the no negative evidence problem The non existence of negative evidence and which role it plays in terms of language acquisition will be explored from different standpoints by nativists as well as non nativists **Inter-identities' in Life, Mind, and Society** Arantza Etxeberria, Kepa Ruiz-Mirazo, Luisa Damiano, 2021-08-18
