School Reform in an Era of Standardization explores how teachers and school based administrators navigate the processes of accountability and standardization in schooling systems and settings. It provides clear insights into how the work and learning of teachers and students in schools have been dramatically reconstituted by increased pressures of external political scrutiny and accountability. The book reveals in detail the nature and effects of standardization processes upon schools and schooling systems. Specifically it shows how curriculum development, teaching and assessment practices have all been recalibrated under conditions of increased external scrutiny of teacher and student work and learning and how such processes are manifest in curriculum dominated by attention to literacy and numeracy, more scripted pedagogies and standardized testing. However the research not only elaborates the detrimental effects of such processes but also how those responsible for educating in schools, teachers, heads of curriculum, deputy principals and principals have responded proactively by interpreting, interrogating and challenging these conditions. In this way it provides resources for hope, evidence of what are described as more authentic accountabilities and at the same time it provides a clear portrait of the difficulty of fostering substantive curriculum, teaching and assessment reform during an era of increasingly reductive accountability processes. It will be an invaluable resource for understanding and enhancing practices in schools and school systems in the decades to come and for giving hope to educators in the ongoing work of rebuilding trust in public education.

Helping Children Learn Mathematics, 5th Australian Edition Robert Reys, Mary Lindquist, Diana V. Lambdin, Nancy L. Smith, Anna Rogers, Leicha Bragg, Audrey Cooke, Melissa Fanshawe, Mark Gronow, 2025-10-10. *Asian Migration and Education Cultures in the Anglosphere* Megan Watkins, Christina Ho, Rose Butler, 2019-03-27. Asian migration and mobilities are transforming education cultures in the Anglosphere, prompting mounting debates about tiger mothers and dragon children and competition and segregation in Anglosphere schools. This book challenges the cultural essentialism which prevails in much academic and popular discussion of Asian success and in relation to Asian education mobilities. As anxiety and aspiration within these spaces are increasingly ethnicised, the children of Asian migrants are both admired and resented for their educational success. This book explores popular perceptions of Asian migrant families through in depth empirically informed accounts on the broader economic, social, historical and geo-political contexts within which education cultures are produced. This includes contributions from academics on global markets and national policies around migration and education, classed trajectories and articulations, local formations of ethnic

capital and transnational assemblages that produce education and mobility as means for social advancement At a time when our schooling systems and communities are undergoing rapid transformations as a result of increasing global mobility this book is a unique and important contribution to an issue of pressing significance This book was originally published as a special issue of the Journal of Ethnic and Migration Studies Year 5 Naplan*-style Tests James A.
