Beginning Python Magnus Lie Hetland, 2017 **Beginner's Programming Guide with Python V3.40** Kaiching Chang, 2015-09-09 Python is an object-oriented programming language. Its important philosophy is summarized by PEP 20: Like Beautiful is better than ugly, Explicit is better than implicit, Simple is better than complex, Complex is better than complicated, And so on. The most important philosophy is simple. So, Keep it simple. When you write a Python program, the only thing you should keep in mind is the above sentence. But what is the meaning of simple? It is a good question, right? Simply speaking, the simple is a style and a thinking. That is to say, you should use a direct, obvious and effective way to design a software using Python in any case.
