**Mega-event Cities: Urban Legacies of Global Sports Events** Valerie Viehoff,Gavin Poynter,2016-03-02 Mega events represent an important moment in the life of a city providing a useful lens through which we may analyse their cultural social political and economic development In the wake of the International Olympic Committee's IOC's concerns about gigantism and wider public concerns about rising costs it was imperative in the C21st to demonstrate the long term benefits that arose for the city and nations from hosting premier sporting events London 2012 was the first to integrate the concept of legacy from the moment a bid to host the Olympic and Paralympic Games was being considered London proposed an ambitious programme of urban renewal for East London Subsequent host city bids have adopted the legacy narrative and as this book demonstrates aligned this to major schemes of urban development and renewal Bringing together scholars practitioners and policy makers this book focuses upon the legacies sought by cities that host major sports events It analyses how governments the IOC and others define and measure legacy It also focuses upon the challenges and opportunities facing future host cities of mega events looking at their aspirations and the intended impact upon their domestic and international development It questions what the global shift in geographical location of mega events means for sports development and the business of sport what the attractions are for cities seeking to harness the hosting of a mega event and whether there may be longer term consequences for the bidding and hosting major sporting events in the wake of the widespread social unrest that accompanied the preparations in Brazil for hosting the FIFA World Cup 2014 and the summer Olympics 2016 and in Turkey where there was significant opposition to bid for the 2020 summer Olympiad

[Mega-event Cities](#) Gavin Poynter,Valerie

Viehoff,2015 This book focuses upon the legacies sought by cities that host major sports events It analyses how governments the IOC and others define and measure legacy It also focuses upon the challenges and opportunities facing future host cities of mega events and questions what the global shift in geographical location of mega events means for sports development and the business of sport and what are the attractions for cities seeking to harness the hosting of a mega event and whether there may be longer term consequences for the bidding and hosting major sporting events

A Case Study of the 2004 Olympic Games in Athens, Greece* Manuela Stögerer,Lisa Faulenbach,Egle Rasimaviciute,Bartek Matuszewski,Anna Schröder,Dennis Ngo,2015-07-21 Seminar paper from the year 2014 in the subject Business economics Business Management Corporate Governance grade 2 Aalborg University language English abstract Mega Events as the Olympic Games are generators of urban change and associated with positive impact for

the hosting city at first sight At the same time real life examples demonstrate that these hallmark events leave a physical imprint and commonly a challenging long lasting legacy to deal with The project Mega Events in the complex city identifies the challenges that need to be considered when making changes in the built environment while hosting a Mega Event The aim is to provide recommendations for further hosting cities in order to minimize the negative consequences a Mega Event may entail The project takes its starting point in examining the impact that a Mega Event has on the city The city as a complex system already bears a number of existing conflicts Placing a Mega Event into this complex system creates additional challenges with contradicting issues between short term vs long term planning large scaled demands vs local needs old vs new built environment as well as expectations vs reality Those challenges are approached in the case study of Athens Olympics 2004 to examine the burdens a city has to face after hosting a Mega Event Further best practice examples of the four cities London Barcelona Vancouver and Los Angeles who already hosted the Olympics in the past are presented in order to show an alternative way of dealing with the occurring challenges Through investigating positive and negative past cases of Olympics recommendations for further hosting cities are developed The recommendations comprise that Mega Events should be used as driving force for the overall cities strategy and evince long term planning Thus urban renewal can be affected positively and the after use of related large scale facilities can be ensured which reduces the financial burden for the hosting city Furthermore the social shadow a Mega Event may entail can be countered by integrating the needs of the local community Considering these recommendations should help to lead to a positive reputation of the Mega Event and enables the cities to fulfil their hopes and expectations related to the Mega Event
