Unexplained Mysteries Brian Kingsley, 2019-12-08 Explore Some Of The Most Fascinating Mysteries Of All Time Book 1 Unexplained Mysteries Of The World Humanity has come so far and explored so much As a species we have more or less conquered the entire Earth and all of its resources We have built towering structures intricate systems and settled everywhere from the tallest peaks to the deepest valleys We have now entered what many like to think of as the enlightened scientific era where old superstitions and fears have been abolished and the mysteries of the past have been solved Basically many of us like to think we have figured it all out However whether we want to admit it or not we are still surrounded by plenty of enigmas Unexplained phenomena such as confirmed instances of remote viewing or sightings of strange beings like Bigfoot may sow a seed of doubt in even the surest of individuals While some sneer at or shy away from the thought of investigating the mysterious there are also those who feel curious maybe even energized at the thought of exploring something completely new As Neil Armstrong once said Mystery creates wonder and wonder is the basis for man's desire to understand If you are one of those who seek to feel wonder this book is for you Herein you will find a varied collection of some of the most intriguing unexplained mysteries of our time From the puzzling artifacts of a lost civilization to psychic visions and shocking UFO landings by the end of this book you will have plenty of captivating questions to ponder and investigate further Book 2 Bigfoot The Other Ones Bigfoot also called Sasquatch is thought to be a large hairy ape like being that inhabits some of the dense forests and remote mountain ranges of North America Although solid scientific evidence of the creature is lacking stories of sightings and encounters have been steadily accumulating throughout the years

As a result Bigfoot has been placed in the category of so called cryptids creatures that are thought by some to exist on Earth but have yet to be properly documented by modern science Others in this category include the mysterious waterborne dinosaur like being popularly known as the Loch Ness monster as well as the goat eating Chupacabra of South America Due to the sheer volume of eyewitness accounts involving Bigfoot most people in the Western hemisphere recognize the general description of this creature What few may realize however is that the Sasquatch is not unique to North America Or at least stories of mysterious bipedal hominids are not From the mountainous regions of Nepal to the wild outback of Australia tales of such beings have existed throughout history In many cases the descriptions of these creatures seem to match Bigfoot So then a few questions naturally arise Are these all part of a singular long lost species of great ape or are they separate beings with different genetic lineages How similar are they to each other where do they live and is there any evidence of their existence We will explore the answers to these questions and many more in this book

The Rough Guide to Unexplained Phenomena Bob Rickard, John Michell, 2007-09-03 The Rough Guide to Unexplained Phenomena is an exploration of the zone that lies between the known and the unknown a shadowy territory that s home to the lake monsters combusting people teleporting frogs and man eating trees Taking a Fortean path between dogmatic scientists and credulous believers the authors trace tales of wonder back to their sources drawing from a huge archive of observations opinions and discussions This updated second edition boasts new illustrations and plenty of intriguing new sections from near death experiences to ghosts haunted houses and mysterious mass deaths There are many things which are not yet known or understood about our world as this guide shows there are many riddles to solve and wonders to experience Decide for yourself with The Rough Guide to Unexplained Phenomena
