*Post-traumatic Culture* Kirby Farrell, 1998-09-29 According to Kirby Farrell the concept of trauma has shaped some of the

central narratives of the 1990s from the war stories of Vietnam vets to the video farewells of Heaven's Gate cult members from apocalyptic sci fi movies to Ronald Reagan's memoir Where's the Rest of Me In Posttraumatic Culture Farrell explores the surprising uses of trauma as both an enabling fiction and an explanatory tool during periods of overwhelming cultural change Farrell's investigation begins in late Victorian England when physicians invented the clinical concept of traumatic neurosis for an era that routinely categorized modern life as sick degenerate and stressful He sees similar developments at the end of the twentieth century as the Vietnam war and feminism returned the concept to prominence as posttraumatic stress syndrome Seeking to understand the psychological dislocation associated with these two periods Farrell analyzes conflicts produced by dramatic social and economic changes and suddenly expanded horizons He locates parallels between the cultural fantasies of the 1890s in novels and stories by Arthur Conan Doyle Rider Haggard H G Wells Bram Stoker and Oscar Wilde and novels and films of the 1990s that explore such issues as child sexual abuse domestic violence unemployment racism and apocalyptic rage In their dependence on late Victorian models the cultural narratives of 1990s America imply a crisis of storylessness deeply implicated in the sense of injury that haunts the close of the twentieth century
