Air-conditioning System Design Manual Walter T. Grondzik, 2007 The Air Conditioning Manual assists entry level engineers in the design of air conditioning systems. It is also usable in conjunction with fundamental HVAC R resource material as a senior or graduate level text for a university course in HVAC system design. The manual was written to fill the void between theory and practice to bridge the gap between real world design practices and the theoretical calculations and analytical procedures or on the design of components. This second edition represents an update and revision of the manual. It now features the use of SI units throughout, updated references and the editing of many illustrations. Helps engineers quickly
