## **Asia Pacific Strategic Relations**

**Asia-Pacific Strategic Relations** William T. Tow, 2001-12-10 This comprehensive 2002 book is an overview of security issues in the Asia Pacific. It is also an argument for a strategy that promises to achieve greater regional stability. It argues that current approaches by policy makers increase the likelihood of conflict. Instead it proposes that a strategy of convergent security be adopted to build a more enduring and peaceful regional security framework. A concise survey of key approaches to regional security politics it presents a vast selection of empirical discussion both historical and current. Assessing the outlook for the three powers most likely to vie for regional dominance the United States, China and Japan the book also reviews the prospects for other secondary powers including Korea and Taiwan and analyses the role of Australia and the ASEAN nations of Southeast Asia. Unique accessible authoritative and broad ranging survey designed for a wide body of analysts and students of contemporary Asian politics and strategy

**New Dynamics in US-China Relations** Mingjiang Li, Kalyan M. Kemburi, 2014-10-17 Washington's strategic pivot to Asia and Beijing's pursuit of new strategic and security interests in the region have led to increasing tensions between the two powers. US leaders have stressed that their increased interest in Asia is driven by a desire to benefit from the thriving regional economies as well as to play the leading role in maintaining peace and stability in the region. However Beijing is particularly concerned about US efforts to consolidate its alliances and deepen security partnerships with a number of regional states. Given the centrality of the two powers to the strategic stability and economic development of the region these new dynamics in US-China relations must be properly understood and appropriately handled. This book examines the growing Sino-US strategic rivalry in the Asia Pacific alongside the strategies employed in the management of this relationship. In turn it illuminates the sources of conflict and cooperation in US-China relations looking specifically at maritime disputes, economic relations, energy security, non-traditional security, defence and strategic forces and Taiwan. Finally it explores the role of regional states in shaping US-China relations and in doing so covers the influence of Japan, India, the Korean Peninsula, the Philippines, Vietnam, Myanmar and Cambodia. With chapters from leading scholars and analysts this book deals with a diverse range of issues including strategic rivalry, expanding regional trade relations, non-traditional security issues, the role of energy security, maritime security and how Asian states view their relations with the US and China respectively. New Dynamics in US-China Relations will be of huge interest to students and scholars of Asian politics, US politics, international relation and security studies as well as practitioners involved in framing and implementing foreign security and economic policy pertaining to the Asia Pacific.

**Asia-Pacific** David Lai, 2013 Dr David Lai provides a timely assessment of the geostrategic significance of Asia Pacific. His monograph is also a thought provoking analysis of the US strategic shift toward the region and its implications. Dr Lai judiciously offers the following key points. First Asia Pacific which covers China, Northeast Asia and Southeast Asia is a region with complex currents. On the one hand there is an unabated region wide drive for economic development that has been pushing Asia

Pacific forward for decades On the other this region is troubled with aside from many other conflicts unsettled maritime disputes that have the potential to trigger wars between and among Asia Pacific nations Second on top of these mixed currents China and the United States compete intensely over a wide range of vital interests in this region For better or for worse the U S China relationship is becoming a defining factor in the relations among the Asia Pacific nations Third the U S strategic shift toward Asia Pacific is as President Obama puts it not a choice but a necessity Although conflicts elsewhere especially the ones in the Middle East continue to draw U S attention and consume U S foreign policy resources the United States is turning its focus toward China and Asia Pacific Fourth in the mid 2000s the United States and China made an unprecedented strategic goodwill exchange and agreed to blaze a new path out of the tragedy that often attends great power transition Fifth at this time of U S strategic reorientation and military rebalancing toward Asia Pacific the most dangerous consideration is that Asia Pacific nations having disputes with China can misread U S strategic intentions and overplay the U S card to pursue their territorial interests and challenge China Finally territorial dispute is becoming an urgent issue in the Asia Pacific *India's Ocean* David Brewster, 2014-03-26 This book assesses India's role as a major power in the Indian Ocean Many see the Indian Ocean as naturally falling within India's sphere of influence but as this book demonstrates India has a long way to go before it could achieve regional dominance The book outlines the development of Indian thinking on its role in the Indian Ocean and examines India's strategic relationships in the region including with maritime South Asia the Indian Ocean islands East Africa the Middle East Southeast Asia and Australia The book then discusses India's ambivalent relationship with the United States and explores its attitude towards China's growing power in the Indian Ocean It concludes by discussing the region's evolving strategic order does India have what it takes to become the leading power in the region

Green,2017-03-21 Soon after the American Revolution certain of the founders began to recognize the strategic significance of Asia and the Pacific and the vast material and cultural resources at stake there Over the coming generations the United States continued to ask how best to expand trade with the region and whether to partner with China at the center of the continent or Japan looking toward the Pacific Where should the United States draw its defensive line and how should it export democratic principles In a history that spans the eighteenth century to the present Michael J Green follows the development of U S strategic thinking toward East Asia identifying recurring themes in American

statecraft that reflect the nation's political philosophy and material realities Drawing on archives interviews and his own experience in the Pentagon and White House Green finds one overarching concern driving U S policy toward East Asia a fear that a rival power might use the Pacific to isolate and threaten the United States and prevent the ocean from becoming a conduit for the westward free flow of trade values and forward defense By More Than Providence works through these problems from the perspective of history's major strategists and statesmen from Thomas Jefferson to Alfred Thayer Mahan and Henry Kissinger It records the fate of their ideas as they collided with the realities of the Far East and adds clarity to America's stakes in the region especially when compared with those of Europe and the Middle East
