## **Asian Security Practice Material And Ideational Influences:**

**Asian Security Practice** Muthiah Alagappa, 2022 Despite the end of the Cold War security continues to be a critical concern of Asian states Allocations of state revenues to the security sector continue to be substantial and have in fact increased in several countries As Asian nations construct a new security architecture for the Asia Pacific region Asian security has received increased attention by the scholarly community But most of that scholarship has focused on specific issues or selected countries This book aims to lay the groundwork for a comprehensive in depth understanding of Asian security by investigating conceptions of security in sixteen Asian countries The book undertakes an ethnographic country by country study of how Asian states conceive of their security For each country it identifies and explains the security concerns and behavior of central decision makers asking who or what is to be protected against what potential threats and how security policies have changed over time This inside out or bottom up approach facilitates both identification of similarities and differences in the security thinking and practice of Asian countries and exploration of their consequences The crucial insights into the dynamics of international security in the region provided by this approach can form the basis for further inquiry including debates about the future of the region The book is in three parts Part I critically reviews and appraises the debate over defining security and provides a historical overview of international politics in Asia Part II investigates security practices in sixteen Asian countries the countries selected and grouped on the basis of security independence Based on the findings of the country studies and drawing on other published works Part III compares the national practices with a view to identifying and explaining key characteristics of Asian security practice and conceptualization on the basis of the Asian experiences

*Asian Security Order* Muthiah Alagappa, 2003 More than a decade has passed since the end of the Cold War but Asia still faces serious security challenges These include the current security environment in the Korean peninsula across the Taiwan Strait and over Kashmir the danger of nuclear and missile proliferation and the concern with the rising power of China and with American dominance Indeed some experts see Asia as a dangerous and unstable place Alagappa disagrees maintaining that Asia is a far more stable predictable and prosperous region than it was in the postindependence period This volume also takes account of the changed security environment in Asia since September 11 2001 Unlike many areas studies approaches Alagappa's work makes a strong case for taking regional politics and security dynamics seriously from both theoretical and empirical approaches The first part of this volume develops an analytical framework for the study of order the salience of the different pathways to order is examined in the second part the third investigates the management of specific security issues and the final part discusses the nature of security order in Asia

**Critical security in the Asia-Pacific** Anthony Burke, Matt McDonald, 2021-06-15 In the wake of 9 11 the Asian crisis and the 2004 tsunami traditional analytical frameworks are increasingly unable to explain how individuals and communities are rendered insecure or advance individual global or environmental security In the Asia Pacific the accepted wisdom of realism has meant that analyses rarely move beyond the statist militarist and exclusionary assumptions that underpin traditional realpolitik This innovative new book challenges these limitations and addresses the missing problems people and vulnerabilities of the Asia Pacific region It also turns a critical eye on traditional interstate strategic dynamics Critical security in the Asia Pacific applies both a critical theoretical approach that interrogates the deeper assumptions underpinning security discourses and a human centred policy approach that focuses on the security welfare and emancipation of individuals and communities Leading Asia Pacific researchers combine to apply these frameworks to the most pressing issues in the region from the Korean peninsula to environmental change Indonesian conflict the war on terror and the plight of refugees The result is a sophisticated and accessible account of often neglected realities of marginalization in the region and a compelling argument for the empowerment and security of the most vulnerable
