Assessing Older Persons Measures Meaning And Practical Applications:

Assessing Older Persons Robert L. Kane, Rosalie A. Kane, 2000 This is a unique text and reference on the multidimensional assessment of older persons. It combines detailed accounts of measures for a wide range of functions with discussions of their applications in the care of older persons. The effort throughout is to combine information on specific measures with insight into how and when each measure should be used **Assessing Older Persons** Marilyn Eells, 2004

Assessments, Treatments and Modeling in Aging and Neurological Disease Colin R. Martin, Victor R Preedy, Rajkumar Rajendram, 2021-06-01 Assessments Treatments and Modeling in Aging and Neurological Disease The Neuroscience of Aging is a comprehensive reference on the diagnosis and management of neurological aging and associated disorders. The book discusses the mechanisms underlying neurological aging and provides readers with a detailed introduction to the aging of neural connections and complexities in biological circuitries as well as the interactions between genetics, epigenetics and other micro environmental processes. It also examines pharmacological and non pharmacological interventions of age related conditions that affect the brain including Alzheimer's, stroke and multiple sclerosis. Provides the most comprehensive coverage of the broad range of topics related to the neuroscience of aging. Features sections on diagnosis and biomarkers of neurological aging, Alzheimer's and stroke. Contains an abstract key facts, a mini dictionary of terms and summary points in each chapter. Focuses on neurological diseases and conditions linked to aging, environmental factors and clinical recommendations. Includes more than 500 illustrations and tables Measurement Scales Used in Elderly Care Abhaya Gupta, Almas Rehman, 2017-11-22 This unique, concise ready reference for daily use collates for the first time the most useful practical and simple assessment scales used in geriatric settings. It provides tools to identify clinical conditions and health outcomes objectively and reliably. It is essential as a clinical primer and everyday reference guide for all practising and training members of multidisciplinary teams including consultants and doctors in specialist training, career grade doctors and general practitioners and medical students, nurses, health visitors, dieticians and social workers, allied health professionals such as physiotherapists, occupational therapists, speech and language therapists and managers of elderly care services. Assessment is central to the practice of Geriatric Medicine. All members of the multidisciplinary team require a sound knowledge of the basic principles of measurement scales. We need to be competent in using and selecting appropriate scales, understanding which scales are valid and fit for purpose. Unfortunately, up to now this has been a difficult task, often requiring reference to original papers. Dr Gupta's scholarship has come to the rescue. He has trawled through the many hundreds of scales available, selecting those most useful for the specialty. This book will be valuable to all members of the multidisciplinary team. Dr Gupta has done an excellent job outlining the theory and practice of measurement scales. He has put together an extremely useful compendium of scales. I congratulate him and wish his publication every success. I can foresee this publication becoming an essential text for every unit library and a valuable book for individual clinicians. Dr Jeremy

Playfer in his Foreword This book summarises the most commonly used validated assessment scales which can be used by medical students postgraduate trainees consultants and the multi disciplinary team members I hope a copy of this book will be kept on every ward outpatient department and GP practice for daily use and reference Professor Bim Bhowmick OBE in his Foreword

[Handbook of Social Work in Health and Aging](#) Barbara

Berkman,2006-02-09 The Handbook of Social Work in Health and Aging is the first reference to combine the fields of health care aging and social work in a single authoritative volume These areas are too often treated as discrete entities while the reality is that all social workers deal with issues in health and aging on a daily basis regardless of practice specialization As the baby boomers age the impact on practice in health and aging will be dramatic and social workers need more specialized knowledge about aging health care and the resources available to best serve older adults and their families The volume s 102 original chapters and 13 overviews written by the most experienced and prominent gerontological health care scholars in the United States and across the world provide social work practitioners and educators with up to date knowledge of evidence based practice guidelines for effectively assessing and treating older adults and their families new models for intervention in both community based practice and institutional care and knowledge of significant policy and research issues in health and aging A truly monumental resource this handbook represents the best research on health and aging available to social workers today

Family Caregivers on the Job Carol Levine,2004 More than 27 million Americans care for a seriously ill or aging relative at home Yet neither health care professionals nor policymakers have the tools necessary to describe the tasks family caregivers perform the first step toward developing supportive services and policies Instead they have relied on Activities of Daily Living ADLs and Instrumental Activities of Daily Living IADLs measures developed to assess care recipients functional deficits to assess the realities of the lives of their care providers The authors of this book seek to redress the gap
