Computer Aided Decision Support in Telecommunications Phil G. Flavin,Ken A.E. Totton,2012-12-06 In bringing together this book the editors have kept two goals in mind Firstly the goal of educating the reader by giving an insight into the wealth of computing and mathematical techniques now being used to build decision support systems Secondly of aiming to stimulate the imagination by including an eclectic mix of contributions from a wide range of business areas to demonstrate that there is no field in which modern decision support techniques cannot usefully be applied The quintessence of decision support systems is that they are designed to assist people in establishing the best course of action in a given situation but not to automate or tell them prescriptively how to achieve a goal

Value Based and Intelligent Asset Management Adolfo Crespo Márquez,Marco Macchi,Ajith Kumar Parlikad,2019-06-29 The fundamental motivation of this book is to contribute to the future advancement of Asset Management in the context of industrial plants and infrastructures The book aims to foster a future perspective that takes advantage of value based and intelligent asset management in order to make a step forward with respect to the evolution observed nowadays Indeed the current understanding of asset management is primarily supported by well known standards Nonetheless asset management is still a young discipline and the knowledge developed by industry and academia is not set in stone yet Furthermore current trends in new organizational concepts and technologies lead to an evolutionary path in the field Therefore this book aims to discuss this evolutionary path starting first of all from the consolidated theory then moving forward to discuss The strategic understanding of value based asset management in a company An operational definition of value as a concept on the background of value based asset management The identification of intelligent asset management with the aim to frame a set of tools recommended to support the asset related decision making process over the asset lifecycle The emergence of new technologies such as cyber physical systems and digital twins and the implications of this on asset management
