<p>Paper 9706/21 Structured Questions</p>

Key messages:

Candidates should be encouraged to pay more attention to detail when reading and answering the computational questions. In addition, candidates would gain higher marks if they spent more time developing their explanations and discussions in the discursive questions. The application of the International Accounting Standards (terminology and layouts) is now expected at this level.

General comments:

The performance of candidates was varied and reflected the approach centres had adopted to the coverage of the syllabus. All the questions were compulsory and covered various topics on the syllabus. It was expected that all candidates should be able to attempt the structured questions on this examination paper.

Candidates are reminded that questions can be asked on any aspect of the syllabus and that a thorough knowledge of the subject is necessary in order to achieve a good grade.

When preparing for the examination candidates are advised to work through relevant questions on previous examination papers and appropriate exercises in textbooks.

Candidates are reminded that an incorrect figure without supporting calculations will lose marks, but if calculations are provided some of the available marks may be awarded even if the final figure is incorrect.

Comments on specific questions

Question 1

(a) (b) Both (a) and (b) were generally answered well, with the majority of candidates scoring full marks. Many candidates prepared control accounts to calculate the credit purchases and credit sales with just a few forgetting to add on the cash sales in (b). There were some candidates who incorrectly put the purchase of a new vehicle in the purchases calculation and the sale of the old vehicle in the sales calculation.

(c) Although this question appeared to cause some problems for candidates several candidates managed to gain full marks. Weaker candidates confused margins and mark-ups; and others applied the 40% adjustment to the sales figure to derive the gross profit for one mark but forgot to apply the remaining 60% as the cost of sales, using a different figure entirely.

The 60% adjustment to the \$14 000 to derive the cost of the estimated closing inventory was often omitted, candidates incorrectly using the full \$14 000. Sometimes, the figure was ignored altogether.

(d) The main problem here was in the calculation of the vehicle depreciation. Many candidates depreciated over the full three years to give \$12 000 despite the question clearly stating that no depreciation was to be charged in the year of disposal. Others ignored the \$3600 received from the sale of the old vehicle and some were clearly unsure of the meaning of 'trade-in' and either ignored it, or put it in with the bank figure. Despite the difficulties encountered many scored some marks here and quite a number scored full marks. Candidates must read the questions carefully before answering.
