Assessing Knowledge Of Retirement Behavior:

Assessing Knowledge of Retirement Behavior National Research Council, Division of Behavioral and Social Sciences and Education, Commission on Behavioral and Social Sciences and Education, Panel on Retirement Income

Modeling, 1996-08-30 This book brings together in one volume what researchers have learned about workers, employers, and retirees that is important for formulating retirement income policies. As the U.S. population ages, there is increasing uncertainty about the solvency of the Social Security and Medicare systems and the adequacy of private pensions to provide for people's retirement needs. The volume covers such critical behaviors as workers' decisions to retire, people's choices of saving over consumption, and employers' decisions about hiring older workers and providing pension and health care benefits. Also covered are trends in mortality, health status, and health care costs that are key to projecting the likely costs and effects of alternative retirement income security policies and a strategy for combining data and research knowledge into a policy modeling framework.

Improving Data on America's Aging Population National Research Council, Division of Behavioral and Social Sciences and Education, Commission on Behavioral and Social Sciences and Education, Committee on National Statistics, 1996-12-20 The Committee on National Statistics and the Committee on Population at the request of the NIA convened a workshop in March 1996 to discuss data on the aging population that address the emerging and important social, economic, and health conditions of the older population. The purposes of the workshop were to identify how the population at older ages in the next few decades will differ from the older population today to understand the underlying causes of those changes to anticipate future problems and policy issues and to suggest future needs for data for research in these areas. The scope of the workshop was broader than that of the 1988 CNSTAT report including not only data on health and long term care but also actuarial, economic, demographic, housing, and epidemiological data needs for informing public policy.

Gustman, Thomas L. Steinmeier, 1998 Abstract For each year of work under the Social Security System immigrants realize higher benefits than U S born even when their earnings are identical in all years the immigrant has been in the US Two features of the social security benefit calculation are responsible the social security benefit formula transfers benefits toward those with low lifetime covered earnings and all years an immigrant spends outside the US are treated as years of zero income Immigrants with high earnings who have worked in the US for only a 10 20 years benefit most from these procedures If instead earnings were averaged only over the years an immigrant resides in the US and benefits prorated immigrants would receive the same return on their social security taxes as US born who have the same earnings in each year It is difficult to justify the current procedures determining benefits for immigrants on the basis of income or wealth differences between US and foreign born Among HHRs respondents mean total wealth of immigrants is 92% of the mean total wealth of US born while the mean income of immigrants exceeds the mean income of US born by 3% But income and wealth are less evenly distributed among foreign born than US born Depending on whether the appropriate period for calculating benefits is taken to be 35 or 40 years prorating would reduce the present value of benefit payments to the cohort of immigrants born from 1932 1941 91% of the HRS cohort by 7 5 billion or 15 billion respectively The 1932 1941 cohort represents 1 7 of all foreign born who are now 25 64 We also ask whether from a selfish financial viewpoint US born participants would have preferred to have immigrants from the HRS cohort included in social security The answer is yes Despite their better deal most immigrants in the HRS cohort will pay more in taxes than they will receive in benefits although just barely
