The European Conference on Numerical Mathematics and Advanced Applications ENUMATH is a series of conferences held every two years to provide a forum for discussion on recent aspects of numerical mathematics and their applications. The first ENUMATH conference was held in Paris 1995 and the series continued by the one in Heidelberg 1997, Jyväskylä 1999, Ischia 2001, Prague 2003 and Santiago de Compostela 2005. This volume contains a selection of invited plenary lectures, papers presented in minisymposia and contributed papers of ENUMATH 2007 held in Graz Austria September 10–14 2007. We are happy that so many people have shown their interest in this conference. In addition to the ten invited presentations and the public lecture we had more than 240 talks in nine minisymposia and forty four sessions of contributed talks and about 316 participants from all over the world, specially from Europe. A total of 98 contributions appear in these proceedings. Topics include theoretical aspects of new numerical techniques and algorithms as well as to applications in engineering and science. The book will be useful for a wide range of readers giving them an excellent overview of the most modern methods, techniques, algorithms and results in numerical mathematics, scientific computing and their applications. We would like to thank all the participants for the attendance and for their valuable contributions and discussions during the conference. Special thanks go to the m isymposium organizers who made a large contribution to the conference the chair persons and all speakers.
