Qualität die man von der Patai Reihe kennt und bietet auch einen umfassenden Index Modern NMR Approaches to the Structure Elucidation of Natural Products Antony Williams, Gary Martin, David Rovnyak, 2016-12-12 The Ghanian plant *Cryptolepis sanguinolenta* is the source of a series of fascinating indoloquinoline alkaloids The most unusual member of this alkaloid series was initially proposed to be a spiro nonacyclic structure named cryptospirolepine and was elucidated in 1993 based on the technologies available at that time There were however several annoying attributes to the structure that bothered analysts for the ensuing 22 years During the two decades that followed the initial work there have been enormous developments in NMR technology Using new experimental approaches specifically homodecoupled $1D$ and $2D$ ADEQUATE NMR experiments developed in 2014 the structure of only a 700 g sample of cryptospirolepine has been revised and is shown on the cover of this volume The confluence of the NMR technological and methodological advances that allowed the revision of the structure of cryptospirolepine using a submilligram sample seems a fitting example for this book which is dedicated to the NMR characterization of various classes of natural products Volume 2 considers data processing and algorithmic based analyses tailored to natural product structure elucidation and reviews the application of NMR to the analysis of a series of different natural product families including marine natural products terpenes steroids alkaloids and carbohydrates Volume 1 discusses contemporary NMR approaches including optimized and future hardware and experimental approaches to obtain both the highest quality and most appropriate spectral data for analysis These books bringing together acknowledged experts uniquely focus on the combination of experimental approaches and modern hardware and software applied to the structure elucidation of natural products The volumes will be an essential resource for NMR spectroscopists natural product chemists and industrial researchers working on natural product analysis or the characterization of impurities and degradation products of pharmaceuticals that can be as scarce as natural product samples

Bioactive Natural Products Detection, Isolation, and Structural Determination Steven M. Colegate, Russell J. Molyneux, 1993-09-29 *Bioactive Natural Products* covers all the aspects of bioactive natural product research from ethnobotanical investigations to modern technologically assisted isolation and structural determination of active compounds An internationally selected group of experts share their knowledge of a wide range of bioactivities and chemical compound classes Topics in the chapters describing the modern application of detection isolation and structural determination techniques are strongly supported by chapters detailing and reviewing research involving various classes of bioactivity Research areas include the immunomodulatory antiviral cytotoxic anti inflammatory and insect behavior classes of bioactivity Extensive referencing throughout the text is helpful to those readers not familiar with this subject and serves as a critical review for more experienced researchers The book is also excellent for upper division or post graduate courses
