Podolsky,Alfred I. Tauber,1997 A major problem for immunologists had long been to determine how cells of the immune system could produce millions of distinct antibodies and produce them on demand The clonal selection theory explains that cells with genetic instructions to produce each antibody exist in the body in small numbers until exposure to the right molecule the antigen triggers the selective cloning that will reproduce the required cells But how can so many different antibody producing cells be generated from such limited genetic material The solution to this question came from new applications of molecular biology and as the authors argue the impact of the new techniques changed both the methods and the concepts of immunology **Basic Immunology** Jacqueline Sharon,1998 With Basic Immunology Jacqueline Sharon presents a concise up to date introduction to the principles of medical immunology The book uses minimal references and includes study questions and answers to reinforce learning *Canadian Journal of Physiology and Pharmacology* ,1996

Seminars in Immunology ,1989
