Novel Star Computer Technology:

Reading Programs for Young Adults Martha Seif Simpson,2015-11-16 School and public libraries often provide programs and activities for children in preschool through the sixth grade but there is little available to young adults For them libraries become a place for work the place to research an assignment or find a book for a report but the thought of the library as a place for enjoyment is lost So how do librarians recapture the interest of teenagers This just might be the answer Here you will find theme based units such as Cartoon Cavalcade Log On at the Library Go in Style Cruising the Mall Space Shots Teens on TV and 44 others that are designed for young adults Each includes a display idea suggestions for local sponsorship of prizes a program game to encourage participation 10 theme related activities curriculum tie in activities sample questions for use in trivia games or scavenger hunts ideas for activity sheets a bibliography of related works and a list of theme related films The units are highly flexible allowing any public or school library to adapt them to their particular needs Digital Culture in Contemporary Fiction Jaime Harrison,2024-02-22 What does it mean to be human in a world increasingly determined by algorithms How can fiction articulate identity and subjectivity in the face of technology which seeks to reduce us to raw data These questions drive a growing body of fiction about our contemporary moment written by authors whose interests extend beyond simply writing about digital culture on a surface level but who seek to delve into the computational constructs which underpin it Through readings of novels by Joshua Cohen Nicola Barker and Neal Stephenson and a visual novel developed by Grasshopper Manufacture Digital Culture in Contemporary Fiction offers the first analysis of the representation of computational algorithms and their cultural consequences in twenty first century fiction Harrison theorizes a new cultural moment in which he places these authors one characterized by a turn in software development towards incorporating models derived from behavioural psychology and vitally fuelled by an abundance of data Throughout its readings Digital Culture in Contemporary Fiction traces how each author gestures towards the literary and philosophical hermeneutics of algorithms and in doing so defines an emerging tradition of fiction attempting to redefine the novel's relevance within digital culture
