Medieval Women and Their Objects Jennifer Adams,Nancy

Bradbury,2021-03-11 The essays gathered in this volume present multifaceted considerations of the intersection of objects and gender within the cultural contexts of late medieval France and England Some take a material view of objects showing buildings books and pictures as sites of gender negotiation and resistance and as extensions of women s bodies Others reconsider the concept of objectification in the lives of fictional and historical medieval women by looking closely at their relation to gendered material objects taken literally as women s possessions and as figurative manifestations of their desires The opening section looks at how medieval authors imagined fictional and legendary women using particular objects in ways that reinforce or challenge gender roles These women bring objects into the orbit of gender identity employing and relating to them in a literal sense while also taking advantage of their symbolic meanings The second section focuses on the use of texts both as objects in their own right and as mechanisms by which other objects are defined The possessors of objects in these essays lived in the world their lives documented by historical records yet like their fictional and legendary counterparts they too used objects for instrumental ends and with symbolic resonances The final section considers the objectification of medieval women s bodies as well as its limits While this at times seems to allow for a trade in women authorial attempts to give definitive shapes and boundaries to women s bodies either complicate the gender boundaries they try to contain or reduce gender to an ideological abstraction This volume contributes to the ongoing effort to calibrate female agency in the late Middle Ages honoring the groundbreaking work of Carolyn P Collette

Object Oriented Environs Julian Yates,2016

Object Oriented Environs is the lively archive of a critical confluence between the environmental turn so vigorous within early modern studies and thing theory object oriented ontology vibrant materialism the new materialism and speculative realism The book unfolds a conversation that attempts to move beyond anthropocentrism and examine nonhumans at every scale their relations to each other and the ethics of human enmeshment within an agentic material world The diverse essays reflections images and ephemera collected here offer a laboratory for probing the mystery and potential autonomy of objects in their alliances and in performance The book is the trace of an event space crafted over a day of conversation in two seminars at the Shakespeare Association of America meeting in 2014 in St Louis and offers its nineteen essays as the end to the work cycle of the collective we crafted that day It is a noisy collation full of bees bushes laundry crutches lists poems plague vectors planks chairs rain shoes meat body parts books and assorted humans living and dead and also a repertoire of dance steps ways of configuring the relations between subject and object actors or actants human and otherwise It is also a book that asks readers to ponder their environs to consider the particularities of their world of their reading experiences and to consider what orders of meaning we might be able to derive from attending closely to all the very many things we come into being with Contributors include Lizz Angello Sallie Anglin Keith M Botelho Patricia A Cahill Jeffrey Cohen Drew Daniel

Morrison, 2015-06-03 Tracing material and metaphoric waste through the Western canon ranging from Beowulf to Samuel Beckett Susan Signe Morrison disrupts traditional perceptions of waste to better understand how we theorize manage and are implicated in what is discarded and seen as garbage Engaging a wide range of disciplines Morrison addresses how the materiality of waste has been sedimented into a variety of toxic metaphors If scholars can read waste as possessing dynamic agency how might that change the ethics of refuse ing and ostracizing wasted humans A major contribution to the growing field of Waste Studies this comparative and theoretically innovative book confronts the reader with the ethical urgency present in waste literature itself **The Shakespearean International Yearbook** Dr Tiffany Jo Werth, Professor Alexa Huang, Professor Tom Bishop, 2015-10-28 What makes Shakespeare centrally exceptional to the current humanities curriculum a measure and minimum unit for University administrations and the general public to recognise the activity of the humanities The contributing authors of essays in this issue of the Yearbook ask how we might push this question beyond familiar categories of the exceptional the superlative the above beyond below or even the normative and familiar in order to scale Shakespeare historically canonically and ontologically in relation to the human Each essay offers a case study devoted to Shakespeare s attentiveness to or implications for a specific location along the scala naturae from the wind of the coelum down to the stony lapis Attending to locations such as these offers to displace the human to a periphery to but one among the jostling forces of life Yet as a centripetal figure of our culture even of world culture Shakespeare proves hard to displace being engrained so deeply in our sense Essays in the volume take up the challenge of evaluating Shakespeare s intimate involvement with our understandings of what is or makes the human In the now established tradition of The Shakespearean International Yearbook the 15th issue surveys important developments and topics of concern in contemporary Shakespeare studies **Ruin Memories** Bjørnar Olsen, Þóra Pétursdóttir, 2014-04-24 Since the nineteenth century mass production consumerism and cycles of material replacement have accelerated increasingly larger amounts of things are increasingly victimized rapidly and made redundant At the same time processes of destruction have immensely intensified although largely overlooked when compared to the research and social significance devoted to consumption and production The outcome is a ruin landscape of derelict factories closed shopping malls overgrown bunkers and redundant mining towns a ghostly world of decaying modern debris normally omitted from academic concerns and conventional histories The archaeology of the recent or contemporary past has grown fast during the last decade This development has been concurrent with a broader popular artistic and scholarly interest in modern ruins in general Ruin Memories explores how the ruins of modernity are conceived and assigned cultural value in contemporary academic and public discourses reassesses the cultural and historical value of modern ruins and suggests possible means for

reaffirming their cultural and historic significance Crucial for this reassessment is a concern with decay and ruination and with the role things play in expressing the neglected unsuccessful and ineffable Abandonment and ruination is usually understood negatively through the tropes of loss and deprivation things are degraded and humiliated while the information knowledge and memory embedded in them become lost along the way Without even ignoring its many negative and traumatizing aspects a main question addressed in this book is whether ruination also can be seen as an act of disclosure If ruination disturbs the routinized and ready to hand to what extent can it also be seen as a recovery of memory as exposing meanings and presences that perhaps are only possible to grasp at second hand when no longer immersed in their withdrawn and useful reality Anybody interested in the archaeology of the contemporary past will find *Ruin Memories* an essential guide to the very latest theoretical research in this emerging field of archaeological thought
