informed the architectural imagination of people across the globe and from very early in their lives Yet not only have the architectural disciplines remained rather absent in the design of these massively consumed spaces architectural theory has likewise failed to articulate a framework to approach the architecture of animation To address this void this book offers an interdisciplinary approach to survey the role of space in animation including in creating humorous moments in early cartoon shorts generating action and suspense in Japanese anime and even stimulating erotic pleasure in pornographic Hentai Exploring the imagined architecture of animation from early motion picture to digital animation and from computer graphics to game engines offers an analytical frame to reconceptualize space An Open Access version of Yuko Yoshida's chapter *Animated Embodiments of Witnessing An Architectural Narrative of Silence* is available on the Liverpool University Press website [Animate Creation](#) John George Wood,1898 [The System of Animate Nature](#) John Arthur Thomson,1920
