PERSPECTIVES AND APPROACHES IN HISTORICAL RESEARCH Florina Alexandra MATEȘAN, Adrian-Gabriel MATEȘAN, 2025-01-01 The volume Perspectives and Approaches in Historical Research brings together the collaborative efforts of young doctoral students from important university centers in Romania the Republic of Moldova and Bulgaria to outline different approaches to researching historical subjects by combining diversified techniques based on interdisciplinarity and pluridisciplinarity The entire endeavor began in 2020 when the National Conference of the Doctoral School of the Faculty of History University of Bucharest was held an event that expanded in 2022 to include participants from neighboring countries The good practices shared during these events contributed to the creation of this volume which through its historical perspective presents models for applying academic rigor in historical research Jerusalem, 1000-1400 Barbara Drake Boehm ,Melanie Holcomb, 2016-09-14 Medieval Jerusalem was a vibrant international center home to multiple cultures faiths and languages Harmonious and dissonant voices from many lands including Persians Turks Greeks Syrians Armenians Georgians Copts Ethiopians Indians and Europeans passed in the narrow streets of a city not much larger than midtown Manhattan Patrons artists pilgrims poets and scholars from Christian Jewish and Islamic traditions focused their attention on the Holy City endowing and enriching its sacred buildings creating luxury goods for its residents and praising its merits This artistic fertility was particularly in evidence between the eleventh and fourteenth centuries notwithstanding often devastating circumstances from the earthquake of 1033 to the fierce battles of the Crusades So strong a magnet was Jerusalem that it drew out the creative imagination of even those separated from it by great distance from as far north as Scandinavia to as far east as present day China This publication is the first to define these four centuries as a singularly creative moment in a singularly complex city Through absorbing essays and incisive discussions of nearly 200 works of art Jerusalem 1000 1400 Every People Under Heaven explores not only the meaning of the city to its many faiths and its importance as a destination for tourists and pilgrims but also the aesthetic strands that enhanced and enlivened the medieval city that served as the crossroads of the known world **Handbook of Medieval Studies** Albrecht Classen, 2010-11-29 This interdisciplinary handbook provides extensive information about research in medieval studies and its most important results over the last decades The handbook is a reference work which enables the readers to quickly and purposely gain insight into the important research discussions and to inform themselves about the current status of research in the field The handbook consists of four parts The first large section offers articles on all of the main disciplines and

discussions of the field The second section presents articles on the key concepts of modern medieval studies and the debates therein The third section is a lexicon of the most important text genres of the Middle Ages The fourth section provides an international bio bibliographical lexicon of the most prominent medievalists in all disciplines A comprehensive bibliography rounds off the compendium The result is a reference work which exhaustively documents the current status of research in medieval studies and brings the disciplines and experts of the field together **The National Union Catalog, Pre-1956**

Antonova, 2013-06-28 This book contributes to the re emerging field of theology through the arts by proposing a way of approaching one of the most challenging theological concepts divine timelessness through the principle of construction of space in the icon One of the main objectives of this book is to discuss critically the implications of reverse perspective which is especially characteristic of Byzantine and Byzantining art Drawing on the work of Pavel Florensky one of the foremost Russian religious philosophers at the beginning of the 20th century Antonova shows that Florensky s concept of supplementary planes can be used productively within a new approach to the question Antonova works up new criteria for the understanding of how space and time can be handled in a way that does not reverse standard linear perspective as conventionally claimed but acts in its own way to create eternalised images which are not involved with perspective at all Arguing that the structure of the icon is determined by a conception of God who exists in past present and future simultaneously Antonova develops an iconography of images done in the Byzantine style both in the East and in the West which is truer to their own cultural context than is generally provided for by western interpretations This book draws upon philosophy theology and liturgy to see how relatively abstract notions of a deity beyond time and space enter images made by painters
