**Healthcare Politics and Policy in America** Kant Patel,Mark E Rushefsky,2019-08-13 Health policy in the United States has been shaped by the political socioeconomic and ideological environment with important roles played by public and private actors as well as institutional and individual entities in designing the contemporary American healthcare system Now in a fully updated fifth edition this book gives expanded attention to pressing issues for our policymakers including the aging American population physician shortages gene therapy specialty drugs and the opioid crisis A new chapter has been added on the Trump administration s failed attempts at repealing and replacing the Affordable Care Act and subsequent attempts at undermining it via executive orders Authors Kant Patel and Mark Rushefsky address the key problems of healthcare cost access and quality through analyses of Medicare Medicaid the Veterans Health Administration and other programs and the ethical and cost implications of advances in healthcare technology Each chapter concludes with discussion questions and a comprehensive reference list This textbook will be required reading for courses on health and healthcare policy as well as all those interested in the ways in which American healthcare has evolved over time **False Premise, False Promise** Sally C. Pipes,2020-01-07 American health care is at a crossroads Health spending reached 3.5 trillion in 2017 Yet more than 27 million people remain uninsured And it s unclear if all that spending is buying higher quality care Patients doctors insurers and the government acknowledge that the healthcare status quo is unsustainable America s last attempt at health reform Obamacare didn t work Nearly a decade after its passage in 2010 Democrats are calling for a government takeover of the nation s healthcare system Medicare for All The idea s supporters assert that health care is a right They promise generous

universal high quality care to all Americans with no referrals copays deductibles or coinsurance With a sales pitch like that it's no wonder that seven in ten people now support Medicare for All Doctors especially young ones are coming around to the idea of single payer too Democrats led by the progressive wing of the party hope to capitalize on this enthusiasm In 2017 they introduced companion legislation in the House and Senate that would establish Medicare for All They have already promised to do the same when the next Congress convenes in 2019 More than 70 House Democrats have joined a new Medicare for All Caucus Senator Bernie Sanders is effectively already on the presidential campaign trail making his case for single payer If Democrats take the White House and Senate in 2020 and hold onto the House a Medicare for All bill could be among the first pieces of legislation presented to the new president for a signature In this book Sally C Pipes a Canadian native will make the case against Medicare for All She'll explain why health care is not a right and how progressives pressing for single payer are making a litany of promises they can't possibly keep Evidence from government run systems in Canada the United Kingdom and other developed countries proves that single payer forces patients to withstand long waits for poor care at high cost First she'll unpack the Medicare for All plans under consideration in Congress She'll explain how radical they truly are Medicare for All will not save 5 trillion as some of its proponents claim It will cost about 32 trillion over 10 years according to analyses from the Urban Institute and the Mercatus Center It will outlaw private health insurance It will raise taxes by trillions of dollars It will cut pay for doctors to the rates paid by Medicare and thereby exacerbate our nation's shortage of physicians And it will ration care Then Sally will detail the horrors of single payer She'll start in Canada whose single payer system most closely resembles the one progressives have in mind for the United States Analyses of the government run systems in the United Kingdom and a few other developed countries will follow with particular focus on the problems that these systems pose for patients and doctors To substantiate her indictment of single payer Sally will marshal both quantitative and qualitative evidence She'll highlight how Americans fare better than their peers in Canada and the United Kingdom on the health outcomes that are directly linked to the quality of a healthcare system including survival rates for patients with cancer and cardiovascular issues She'll also explain why the health outcomes where the United States performs poorly relative to other nations like infant mortality and life expectancy tell us little about our healthcare system Sally will pepper her text with heart wrenching stories of the human costs of single payer of people who were injured were forced to remain in pain or even died because their government run healthcare system delayed or denied care Too often evangelists for free markets limit their arguments to facts and statistics and fail to appeal to the public's emotions Sally will feature the stories of individuals and families who have been victims of single payer systems These vignettes will help drive home the truth about single payer and why it must not come to the United States She'll conclude with her vision for delivering the affordable accessible quality care the American people are looking for *Focus On: 100 Most Popular 20th-century American Politicians* Wikipedia contributors, **Health Care** Tyler Stevenson, 2018-07-15 Health care reform

act has been a key goal for the Trump administration and the Republican controlled Congress with the main arguments against it including the higher premiums for middle class Americans and the abuse of government power through its control of the insurance industry This volume helps define universal health care explains the arguments for and against it and discusses attempts to implement it on an international scale We've Got You Covered Liran Einav,Amy

Finkelstein,2023-07-25 From a MacArthur Genius MIT economist and pre eminent Stanford economist comes a lively and provocative proposal for American health insurance reform Few of us need convincing that the American health insurance system needs reform But many of the existing proposals focus on expanding one relatively successful piece of the system or building in piecemeal additions These proposals miss the point As the Stanford health economist Liran Einav and the MIT economist and MacArthur Genius Amy Finkelstein argue our health care system was never deliberately designed but rather pieced together to deal with issues as they became politically relevant The result is a sprawling yet arbitrary and inadequate mess It has left 30 million Americans without formal insurance Many of the rest live in constant danger of losing their coverage if they lose their job give birth get older get healthier get richer or move It s time to tear it all down and rebuild sensibly and deliberately Marshaling original research striking insights from American history and comparative analysis of what works and what doesn t from systems around the world Einav and Finkelstein argue for automatic basic and free universal coverage for everyone along with the option to buy additional supplemental coverage Their wholly original argument and comprehensive blueprint for an American universal health insurance system will surprise and provoke We ve Got You Covered is an erudite yet lively and accessible prescription we cannot afford to ignore **CLA Journal** ,2015

The Healthcare Collapse Eldo Frezza,2018-12-12 The evolution of the healthcare system in the U S has seen numerous changes in the last 30 years where fee for service was the mainstay of reimbursement models and hospitals were managed by physicians and patient care was key The early 1990 s saw the emergence of HMOs and other managed care models with physicians handing over leadership roles to corporate entities whose main concern was the bottom line and profitability while patient care and satisfaction suffered The Healthcare Collapse Where We ve been and Where We Need to Go explores the low morale of physicians in this corporate healthcare culture as well as the expansion of hospitals owned by corporations The author focuses on recovering healthcare morals and return value to the individuals who provide active care and not just business This book also examines the possible repercussions of Medicare and Medicaid while address the question of single payer healthcare This book looks at where healthcare has been what has worked and what hasn t and recommends solutions to create a system that focuses on the patient and providing quality care in this age of reimbursement cuts demands for better technology and providing a safer environment for both the patient and clinicians who work in hospitals The author also advocates for a shift in management and recommends hospitals leaders engage physicians and other clinicians in process improvement and other initiatives which can result in a more efficient system one where quality patient care dominant The
