## **Bernie Sanders Nuclear Power:**

**Climate of Contempt** David Spence, 2024-08-06 Why is the United States struggling to enact policies to reduce carbon emissions Conventional wisdom holds that the wealthy and powerful are to blame as the oligarchs and corporations that wield disproportionate sway over politicians prioritize their short term financial interests over the climate's long term health David B Spence argues that this top down narrative misses a more important culprit with critical consequences for the energy transition Climate of Contempt offers a voter centric bottom up explanation of national climate and energy politics one that pinpoints bitter partisanship as the key impediment to transitioning to a net zero carbon future Members of Congress respond to voters whose animosity toward the opposing party makes compromise politically risky The most powerful driver of polarization in turn is the mixture of ideology and social media that constitutes today's information environment which amplifies anger spreads half truths and falsehoods and sows division distorting voters' understandings of the energy transition and their fellow citizens Spence explores the effects of polarization partisanship and propaganda on energy policy and considers how to build a broader climate coalition He contends that cooperation on this crucial issue is still possible but it will require sustained person to person engagement across ideological and partisan boundaries to foster a more productive dialogue Providing a timely and incisive understanding of the politics of the energy transition Climate of Contempt suggests new paths forward and offers hope for a net zero future

*Nuclear Roulette* Gar Smith, 2012 Nuclear power is not clean cheap or safe With Three Mile Island Chernobyl and Fukushima the nuclear industry's record of catastrophic failures now averages one major disaster every decade After three US designed plants exploded in Japan many countries moved to abandon reactors for renewables In the United States however powerful corporations and a compliant government still defend nuclear power while promising billion dollar bailouts to operators Each new disaster demonstrates that the nuclear industry and governments lie to avoid panic to preserve the myth of safe clean nuclear power and to sustain government subsidies Tokyo and Washington both covered up Fukushima's radiation risks and when confronted with damning evidence simply raised the levels of acceptable risk to match the greater levels of exposure Nuclear Roulette dismantles the core arguments behind the nuclear industrial complex's Nuclear Renaissance While some critiques are familiar nuclear power is too costly too dangerous and too unstable others are surprising Nuclear Roulette exposes historic links to nuclear weapons impacts on Indigenous lands and lives and the ways in which the Nuclear Regulatory Commission too often takes its lead from industry rewriting rules to keep failing plants in compliance Nuclear Roulette cites NRC records showing how corporations routinely defer maintenance and lists resulting near misses in the US which average more than one per month Nuclear Roulette chronicles the problems of aging reactors uncovers the costly challenge of decommissioning explores the industry's greatest seismic risks not on California's quake prone coast but in the Midwest and Southeast and explains how solar flares could black out power grids causing the world's 400 plus reactors to self destruct This powerful
