Beschouwingen over de economische orde H. Hoelen, 1995-01-01      **Sustainable Finance and Banking** Marcel Jeucken, 2010-09-23 Banking and finance play a fundamental role in public policy and economic performance as well as in all forms of commerce and industry They are crucial in determining whether society from governments to individual consumers succeeds in following an environmentally sustainable path However those working in the financial sector are largely unaware of the rationale and pressures for sustainable development and its bearing on their work while those in the relevant research and policy areas commonly overlook how vital the financial sector is for progress Marcel Jeucken sets out to rectify this state of affairs in a style which is accessible to those with no experience of environmental finance issues He provides a comprehensive account of their interdependence why the financial sector is crucial to achieving sustainability and why the triple bottom line of commercial environmental and social success points the way forward for banking From a systematic assessment of major banks around the world he presents a comprehensive account of current best practice an analysis of the differences in approach and performance and recommendations of actions and policies for improved performance that will contribute to sustainable development

Faludi, A.J. van der Valk, 2013-04-17 This book is about an art in which the Netherlands excels strategic planning Foreign observers will need little convincing of the merits of Dutch planning They will want to know whether routine explanations small country industrious disciplined people hardened by the perennial fight against the sea hold any water and they will want to know where to look for the bag of tricks of Dutch planners Dutch readers need to be convinced first that planning in the Netherlands is indeed effective before contemplating how this has come about Our message for both is that to the extent that Dutch planners do live in what others are inclined to see as a planners paradise it is a paradise carefully constructed and maintained by the planners themselves This smacks of Bernard Shaw describing a profession as a conspiracy against laity However all knowledge and all technologies are socially constructed meaning that they are the

products of people or groups pursuing often conflicting aims and coming to arrangements about what is to pass as true and good So this takes away the odium of Dutch planners having their own agenda Positioning ourselves We are in the business of interpreting Dutch planning and at the same time committed to improving it This makes us part of the situation which we describe This situation is characterized by the existence of two divergent traditions urban design and the social science discipline called planologie
