Always verify the order to determine what tests will be done & identify the patient

Completing a lab requisition form minimizes costly & dangerous errors

- Labeling of specimens
- Identification # of specimens

Process of withdrawing blood from a vein for laboratory testing

Things to review on the order:

- Ordering provider
- Test & test code
- Diagnosis code that correlates with test (ICD-10)
- Special specimen requirements (fasting)
- Patient demographics
- Insurance/ billing information

For test preparation you must ask when they patient last ate or had something to drink. For a lipid panel the patient must fast because the test will detect fats from the food they ate.

For drug tests, the patient must be asked if they took any medication & the names/ dosages of the drug

Supplies for blood draw:

- Gloves
- Tourniquet
- Alcohol wipes
- Gauze (avoid cotton balls)
- Butterfly needle (for fragile/weak veins/ hand draws)
- Double-pointed needle (21-22 gauge)
- Collection tubes
- Labels/ laboratory requisition

The **LARGER** the gauge # = the **SMALLER** the needle. Typical 21-22 gauge is good. Using the right size is important to prevent hemolysis.
