## **Bernie Sanders Voting Record:**

A Supreme Court Unlike Any Other Kevin J. McMahon, 2024-04-12 Today's Supreme Court is unlike any other in American history. This is not just because of its jurisprudence. It is because today's Court is uniquely distanced from the democratic processes that buttress its legitimacy. For example, five of the nine justices took their seats after winning confirmation with the support of senators who won far fewer votes than their colleagues in opposition, and three of these five justices were also nominated by a president who lost the popular vote. In A Supreme Court Unlike Any Other, Kevin J. McMahon explains the broad historical developments that have brought us here. Drawing on historical and contemporary data and deep knowledge of Court battles during presidencies ranging from Franklin D. Roosevelt to Ronald Reagan to Donald Trump, he offers new insight into the shifting politics of nominating and confirming justices, the changing pool of nominees considered for the Supreme Court, and the increased salience of the Court in presidential and congressional elections. A Supreme Court Unlike Any Other is an eye-opening account of today's Court within the context of US history and the broader structure of contemporary politics.

**Are We Screwed?** Geoff Dembicki, 2017-01-01 A declaration of independence and a call for systemic change from the generation that will be most impacted by climate change. If anyone doubted the potential political power of the Millennial generation, Bernie Sanders' campaign put it in the spotlight. Are We Screwed makes clear that the ardor for change defines this generation, especially when it comes to climate change, and they are willing to consider options that their elders might think naive and impractical, rejecting a capitalism that cares only about profit and a political system riven by false ideology. In telling the stories of his contemporaries around the globe, in describing how they think and the many ways they are already effecting change, Geoff Dembicki documents a historic shift in values and a corresponding rethinking of how social change can happen. As of this year, the millennial generation (18 to 34 year olds) will become North America's largest demographic. It is also the generation that has lived with the looming reality of global warming and will be most affected by its impacts. In vividly reported dispatches from Beijing to Paris, from San Francisco to New York, Dembicki examines what millennial responses to climate change look like and how they are shaping our future. He also provides an essential perspective on how climate change is intensifying generational tensions and shifts in society. In the process, a portrait of a generation emerges that goes a long way toward rebranding it in ways that are positive and full of hope for the future.

Conventional Wisdom, Parties, and Broken Barriers in the 2016 Election Jennifer C. Lucas, Tauna Starbuck Sisco, Christopher J. Galdieri, 2017-11-20 The 2016 presidential election was unconventional in many ways. The election of President Donald Trump caught many by surprise with a true outsider, a candidate with no previous governmental experience and mixed support from his own party, won the election by winning in traditionally Democratic states with coattails that extended to Republican Senate candidates and resulted in unified Republican government for the first time since 2008. This result broke with the pre-election conventional wisdom which expected Hillary Clinton to win the presidency.

and a closer Senate divide This surprising result led many political scientists to question whether 2016 truly marked a major turning point in American elections as portrayed in the media a break from the conventional wisdom or whether it was really the exception that proved the rule In this volume political scientists examine previous theories and trends in light of the 2016 election to determine the extent to which 2016 was a break from previous theories While in some areas it seems as though 2016 was really just what would have been predicted in others this election and the new president pose significant challenges to mainstream theories in political science In particular prominent political scientists examine whether voter trends with particular focus on groups by gender age geography and ethnicity and election issues especially the role of the Supreme Court followed or bucked recent trends Several political scientists examine the unconventional nomination process and whether this signals a new era for political parties The role of conspiracy theories and voter confidence in the administration of elections are also discussed Finally contributors also examine the indirect effect the presidential candidates especially Trump played in congressional election rhetoric
