McCormac, Stephen F. Cernak, 2018 For undergraduate courses in Steel Design Piquing student interest in structural steel design The best selling textbook Structural Steel Design addresses the fundamentals of structural steel design for students pursuing careers in engineering and construction Presented in an easy to read student friendly style the 6th Edition conforms to the latest specifications of the American Institute of Steel Construction AISC and AISC Steel Construction Manual While the material is prepared for an introductory junior or senior course the last several chapters may be used for a graduate class The material is best suited to students with a basic understanding of the mechanics of materials and structural analysis

*Design of Steel Structures* Elias G. Abu-Saba, 2012-12-06 This book is intended for classroom teaching in architectural and civil engineering at the graduate and undergraduate levels Although it has been developed from lecture notes given in structural steel design it can be useful to practicing engineers Many of the examples presented in this book are drawn from the field of design of structures Design of Steel Structures can be used for one or two semesters of three hours each on the undergraduate level For a two semester curriculum Chapters 1 through 8 can be used during the first semester Heavy emphasis should be placed on Chapters 1 through 5 giving the student a brief exposure to the consideration of wind and earthquakes in the design of buildings With the new federal requirements vis a vis wind and earthquake hazards it is beneficial to the student to have some understanding of the underlying concepts in this field In addition to the class lectures the instructor should require the student to submit a term project that includes the complete structural design of a multi

story building using standard design procedures as specified by AISC Specifications Thus the use of the AISC Steel Construction Manual is a must in teaching this course In the second semester Chapters 9 through 13 should be covered At the undergraduate level Chapters 11 through 13 should be used on a limited basis leaving the student more time to concentrate on composite construction and built up girders
