When multiple forces act on an object, they combine to produce a net force, which determines whether the object speeds up, slows down, or changes direction. Understanding how forces act together is essential to explaining various observations from a physics world, such as a ball's trajectory or a car's acceleration.</p> <p>Newton's second law of motion states that the acceleration of an object is directly proportional to the net force acting on it and inversely proportional to its mass. This means that if the net force increases, the acceleration increases proportionally, but if the mass increases, the acceleration decreases. For example, pushing a heavy box with a small force will result in a small acceleration, while pushing a lighter box with the same force will result in a larger acceleration.</p> <p>Newton's third law of motion states that for every action, there is an equal and opposite reaction. This means that when one object exerts a force on another object, the second object exerts an equal and opposite force back on the first. For example, when a person pushes against a wall, the wall pushes back against the person's hands with an equal and opposite force.</p> </div> <p>Answer the questions below for each question.</p> <ol style="list-style-type: none"> <li>Which of the following is NOT a type of force?             <ol style="list-style-type: none"> <li>Gravitational force</li> <li>Electromagnetic force</li> <li>Frictional force</li> <li>Centrifugal force</li> </ol> </li> <li>Which of the following is NOT a type of force?             <ol style="list-style-type: none"> <li>Force</li> <li>Mass</li> <li>Weight</li> <li>Acceleration</li> </ol> </li> <li>Which of the following is NOT a type of force?             <ol style="list-style-type: none"> <li>Force</li> <li>Mass</li> <li>Weight</li> <li>Acceleration</li> </ol> </li> <li>Which of the following is NOT a type of force?             <ol style="list-style-type: none"> <li>Force</li> <li>Mass</li> <li>Weight</li> <li>Acceleration</li> </ol> </li> </ol> <div style="text-align: right;">  </div>
