

U.S. AIR FORCE

# Official Air Force Aerospace Medicine Approved Medications

Effective: 5 JUNE 2014

(Note: This list supersedes the medication list dated 09 JAN 2014)

The approved medication list consists of drugs for acute and chronic conditions, listed by generic name under one of three categories, based on whether they may be self-prescribed without flight surgeon consultation (see over the counter medication list), may be prescribed by the flight surgeon without higher approval, or require waiver. Drugs for acute conditions generally fall under one of the first two categories, while medications for chronic conditions commonly fit into the last category. At the end of the document are listed a number of drugs which are known to be unacceptable for all flying and special operational duty (SOD) classes. Request for waiver of such drugs is highly unlikely.

In general, for all 1042 holders use of any medication whose known actions may affect alertness, judgment, cognition, special sensory function, mood, or coordination requires DNF/DNC or appropriate duty restriction.

A large number of FDA-approved drugs are not listed under either section. If such drugs are used for acute conditions, it should be assured that the drug is disqualifying for flying and/or SOD duty, with the number returning to operational status after the condition has resolved, the medication has been discontinued, and its effects have dissipated, which usually entails one additional day (the "24-hour rule"). For chronic conditions, most common conditions are treatable by one or more of the listed drugs, and use of these drugs is likely to receive favorable consideration and a more expeditious result. If the member is intolerant of or inadequately controlled by a listed medication, but is successfully treated by a non-listed drug, a waiver request for that drug may be submitted to AFMSA/SACPF through the appropriate MAJCOM SG (for rated officers and non-rated personnel). Such requests are not delegated for initial or renewal waivers. The process for approval of such drugs is much more complicated because of the thorough review required. Note: Waivers for non-FDA approved medications will not be considered. All medications and immunizations used by flying and SOD personnel must be FDA approved.

Note that while a specific drug may be acceptable without waiver, the treated condition may still require waiver.

Members pending waiver action must remain DNF/DNC until waiver has been granted. Verbal waivers are NOT authorized. Consult Aerospace Medicine Waiver Guide prior to waiver submission.

For flying SOD personnel, the following medications require ground testing, documented IAW AF 48-120 paragraph 1A, on the individual's DD Form 2768 under "Medications" block on Page 1. IAW AF and MAJCOM guidance and restrictions ([KX Operational Flight Medicine](#)): Ciprofloxacin (mandatory ground test). Tenaxepan/zolpidem (no-go pills) and dextroamphetamine/modafinil (go pills) must be ground tested (if member is eligible for use) OR declination of ground test must be documented. Ground testing results (or declination) must also be updated in AFMS Web. Once successfully ground tested, the operational use of go/no-go medications does not require DNF/DNC. Clinical use of go/no-go medications DODS requires DNF/DNC, despite prior ground testing. Only aircraft/SOD designated in current AF-SG, AF-A3B, and/or MAJCOM guidance are eligible for ground testing and operational use of hypnotics (no-go pills) or stimulants (go pills).

## SUMMARY OF CHANGES:

5 JUNE 2014: Three medications were added for treatment of benign prostate hypertrophy (BPH): silodosin (Rugeral), tamsulosin (Flomax), and alfuzosin (Uroxatral). Sitagliptin was added for the treatment of diabetes. Rifampin was added for tuberculosis converters who do not have active tuberculosis. Topical steroids (administered via metered-dose inhaler) were approved for waiver consideration for Eosinophilic Esophagitis. The diagnosis of "pre-diabetes (includes impaired fasting glucose)" was added to the approved uses of metformin.

Category	Medication		Diagnosis or Condition	Per DODAF	DNF (No Waiver Required)		DNF (Waiver Required)		Notes
	Generic Name (Oral Preparation Unless Specified Otherwise)	Trade Name (Oral AF Medicines)			For Ground Trial	Symptom Controlled (No Side Effect)	Flying 100	Flying 100	
Class	Anticonvulsants	Tylenol	Pain (acute condition only)		3)				DNF until the underlying condition will not interfere with flying duties and there are no adverse side effects. Usage in the acute conditions, less than 4 weeks, and condition does not require waiver.
