## **Boardmaker Using The Toilet:**

**The Potty Journey** Judith A. CouCouvannis, 2023-01-01 Parents of children with autism or other special needs frequently struggle with toilet training their child Toileting a child with special needs is more difficult because there are often additional challenges such as communication difficulties sensory issues behavioral concerns resistance to change inability to generalize a newly learned skill and the need for routine Using traditional toilet training books and methods are not always helpful because the autism population does not think the same way a neurotypical child does The child with autism may not care about pleasing parents or receiving verbal praise Because there may be significant developmental delays the toileting process may not be started until after the age of four Using a diaper to eliminate has been the routine for several years and this can be hard to change Children s books to introducing toilet training may not be appropriate because the child is too big for a potty chair or using the potty chair then transitioning to the toilet becomes yet another change and obstacle in this process All of these concerns may feel insurmountable and overwhelming when making the decision to begin toilet training Judith Coucouvannis has come to the rescue with her new book *The Potty Journey Guide to Toilet Training Children with Special Needs Including Autism and Related Disorders* that empowers parents and professionals with practical information to make this journey a success She uses the concept of a journey trip and all the things one would need to do to make the trip a successful one It is these planning tips and manageable steps that make toileting do able One of the biggest quandaries parents face is not knowing when to start toileting Judy outlines considerations when to begin toileting in the second chapter She discusses mental age which is not the same as chronological age the ability to remain dry for 1 2 hours at a time and being over the age of four when bodily functions are more mature It is also important that you as the parent are emotionally ready for this commitment which takes several weeks and that there are no additional life stressors such as a move divorce job change or major illness One key to successful toileting is using a team approach Everyone who spends time with that child should be involved in the toileting process Children with autism don t generalize from one situation to the next so for success to occur there has to be a consistent toileting routine and approach throughout the child s day which may unfold in several places The author introduces the Daily Progress Record DPR in chapter 3 which is the foundation of the toileting process She teaches how to practice toileting use rewards and supports the child s learning with visual examples She dedicates two chapters to troubleshooting problems The book is peppered with thoughts from parents and professionals who have gone through this journey Their comments offer positive support and encouragement The final chapter is dedicated for stories from those who have completed the toileting journey Ms Coucouvannis also writes about creating independence with toileting how to fade prompts and your presence in the bathroom She also discusses bathroom use in other locations such as the school and public restrooms The hidden curriculum rules for boys and girls public bathroom use are outlined Most mothers are not aware of how different a men s public bathroom is from a women s *The Potty Journey* takes parents and

professionals through the toileting journey which is a challenge but well worth the effort Toileting with independence and confidence is a life long skill without this skill a person's choices are limited and they are dependent on someone else for one of their most basic needs *The Autism Toilet Training Handbook* Mary Wrobel, 2023-05-02 When it comes to toilet training children on the autism spectrum Mary Wrobel's latest book is a must have Toilet training is challenging for most children autistic kids bring different challenges and different situations Wrobel's step by step tips and expert insights are an excellent roadmap for toilet training kids with Asperger's or autism *Visual Thinking Strategies for Individuals with Autism Spectrum Disorders* Ellyn Lucas Arwood, Carole Kaulitz, Mabel M. Brown, 2009 Visuals of all kinds photographs checklists line drawings cartoons flowcharts stick figures etc are commonly used as supports for individuals on the autism spectrum who tend to think and learn visually However not all visuals are created equal and therefore visuals don't all work equally well This companion to *Learning With a Visual Brain in an Auditory World* helps the reader understand how to match the developmental levels of pictures and visuals to the developmental level of the person looking at the visual In this way appropriate visuals provide the language development for children with autism spectrum disorders Drawing from their experience with children and youth for decades the authors also show how effective communication can help reduce the confusion and anxiety that often lead to behavioral outbursts Google Books [Behaviour Skills, Understanding and Modifying Challenging Behaviour](#) Trevor Lewis, 2017 An easy to understand guide to understanding modifying and managing challenging behaviour for Parents Teachers and Support Workers Including helpful advice for new Parents and Parents to be This book covers strategies for neuro typical children and for children and adults with a diagnosis of Autism Spectrum Disorder or a learning disability Includes the top selling booklets *Toilet Training in 2017 Using the Dior Method* and *The Dior Method of Anger Management* The New Zealand based Author Trevor Lewis has had over ten years full time experience working as a behaviour specialist and has come across some of the most challenging issues possible from children and adults of average or above intelligence and those who were intellectually disabled had Autism Aspergers syndrome Fetal Alcohol Spectrum Disorder or other disability This experience is backed up by several years study and a degree in Psychology two years Post Graduate study of and a Post Graduate Diploma in Applied Behaviour Analysis the science of behaviour along with another four years study of Forensic Psychiatry Mental Illness and Addiction He has also had many years experience in teaching others about the skills needed to support people safely and effectively in very challenging situations
