## **Bodily Exchanges Bioethics Border Crossing:**

Bodily Exchanges, Bioethics and Border Crossing Erik Malmqvist, Kristin Zeiler, 2015-12-14 Medical therapy research and technology enable us to make our bodies or parts of them available to others in an increasing number of ways This is the case in organ tissue egg and sperm donation as well as in surrogate motherhood and clinical research Bringing together leading scholars working on the ethical social and cultural aspects of such bodily exchanges this cutting edge book develops new ways of understanding them Bodily Exchanges Bioethics and Border Crossing both probes the established giving and selling frameworks for conceptualising bodily exchanges in medicine and seeks to develop and examine another less familiar framework that of sharing A framework of sharing can capture practices that involve giving up and giving away part of one's body such as organ and tissue donation and practices that do not such as surrogacy and research participation Sharing also recognizes the multiple relationalities that these exchanges can involve and invites inquiry into the context in which they occur In addition the book explores the multiple forms of border crossing that bodily exchanges in medicine involve from the physical boundaries of the body to relational borders as can happen in surrogacy to national borders and the range of ethical issues that these various border crossings can give rise to Engaging with anthropology sociology philosophy and feminist and postcolonial perspectives this is an original and timely contribution to contemporary bioethics in a time of increasing globalization It will be of use to students and researchers from a range of humanities and social science backgrounds as well as medical and other healthcare professionals with an interest in bioethics

Global Bodies in Grey Zones Susanne Lundin, Charlotte Kroløkke, Michael N. Petersen, Elmi Müller, 2016-10-01 Global Bodies in Grey Zones departs from the current globalised market in biological material and treatments Three different forms of medical travel are in focus transplant travel fertility travel and stem cell travel The global travelling includes legally organised cross border care as well as completely illegal activities involving trafficking in bodies and body parts implicating a range of people technologies and treatments The theoretical focus is grey zones various places where people money bodies and so on constitute components in an international market The authors are researchers from the cultural social and medical sciences They examine how people's desperation hopes and longing for health and reproduction fuel the travels

**Transplantation Gothic** Sara Wasson, 2020-10-13 Transplantation Gothic is a shadow cultural history of transplantation as mediated through medical writing science fiction life writing and visual arts in a Gothic mode from the nineteenth century to the present The works explore the experience of donor suppliers recipients and practitioners and simultaneously express transfer related suffering and are complicit in its erasure Examining texts from Europe North America and India the book resists exoticising predatorial tissue economies and considers fantasies of harvest as both product and symbol of structural ruination under neoliberal capitalism In their efforts to articulate bioengineered hybridity these works are not only anxious but speculative The book will be of interest to academics and students researching Gothic studies science fiction critical medical humanities
