**Practices for P-12 Classrooms in the Digital Age** Mitchell, Jessica S.,Vaughn, Erin N.,2019-10-11 The ability to effectively communicate in a globalized world shapes the economic social and democratic implications for the future of P 12

students Digitally mediated communication in an inclusive classroom increases a student's familiarity and comfortability with multiple types of media used in a wider technological culture. However there is a need for research that explores the larger context and methodologies of participatory literacy in a digital educational space. *Participatory Literacy Practices for P-12 Classrooms in the Digital Age* is an essential collection of innovative research on the methods and applications of integrating digital content into a learning environment to support inclusive classroom designs. While highlighting topics such as game based learning, coding education and multimodal narratives, this book is ideally designed for practicing instructors, pre-service teachers, professional development coordinators, instructional facilitators, curriculum designers, academicians and researchers seeking interdisciplinary coverage on how participatory literacies enhance a student's ability to both contribute to the class and engage in opportunities beyond the classroom.

**Creativity and Technology in Mathematics Education** Viktor Freiman, Janet Lynne Tassell, 2018-09-03

This volume provides new insights on creativity while focusing on innovative methodological approaches in research and practice of integrating technological tools and environments in mathematics teaching and learning. This work is being built on the discussions at the mini symposium on Creativity and Technology at the International Conference on Mathematical Creativity and Giftedness (ICMCG) in Denver USA 2014 and other contributions to the topic. The book emphasizes a diversity of views, a variety of contexts, angles and cultures of thought as well as mathematical and educational practices. The authors of each chapter explore the potential of technology to foster creative and divergent mathematical thinking, problem solving and problem posing, creative use of dynamic multimodal and interactive software by teachers and learners as well as other digital media and tools while widening and enriching transdisciplinary and interdisciplinary connections in mathematics classroom. Along with ground breaking innovative approaches the book aims to provide researchers and practitioners with new paths for diversification of opportunities for all students to become more creative and innovative mathematics learners. A framework for dynamic learning conditions of leveraging mathematical creativity with technology is an outcome of the book as well.
