

# **ABNORMAL PSYCHOLOGY FINAL EXAM STUDY NOTES**

## **MODELS OF PSYCHOPATHOLOGY Search for Causes of Abnormal Behavior**

- There are practical implications if we can find causes in this field ☒ We want to:
  - 1) Explain etiology (causes)
  - 2) Identify factors that maintain the behavior
  - 3) Predict causes of the disorder
  - 4) Design effective treatments
- Many different theories have been proposed **Reductionism**
- Faulty claim that action is entire system is caused by **one** of the parts
- Human behavior is caused by interaction of several factors
- Evoked nature-nurture debate (e.g. Jeanie was lacked and chained to a potty in her room and did not have exposure to **many** things which interfered with the development of her brain and she therefore never developed language skills/other skills)
- People will not develop without healthy environment – physiology and environment work together

## **Biological determinism/reductionism**

- Very common
- Focus on biological factors without considering role of environmental factors
- **Phenylketonuria (PKU)**: Enzyme deficiency due to abnormality in chromosome 12 – causes toxic build up of phenylalanine, which is toxic to the developing brain. You have to have a restricted diet to avoid this – if you don't do this if you need to, the child will have severe/profound mental disorders/intellectual disorder. It cannot be reversed
- Another example is autism – if you reach child early (before age 2) with behavioral therapy, nearly 50% will be able to function regularly and most symptoms can even be totally gone

## **Environmental/Cultural Determinism**

- Denies influence of biological factors
- BUT hypothyroidism causes depression, and therapy will not alleviate depression
- Therapy for those with gene for Huntington's chorea (brain disorder caused by one gene) will not stop the development of the disorder
- Sometimes biological factors are so strong that environmental factors will not change it

## **Environmental Perspective**

- Researchers/clinicians look for environmental events – social/biological – that shape behavior
- Treatment approaches: Manipulating/changing environment OR modifying individual's perceptions of the environment
