## **Accelerating Democracy Transforming Governance Through Technology:**

**Accelerating Democracy** John O. McGinnis, 2012-12-09 How to adapt democracy to the accelerating pace of technological change and why it's critical that we do. Successful democracies throughout history from ancient Athens to Britain on the cusp of the industrial age have used the technology of their time to gather information for better governance. Our challenge is no different today but it is more urgent because the accelerating pace of technological change creates potentially enormous dangers as well as benefits. Accelerating Democracy shows how to adapt democracy to new information technologies that can enhance political decision making and enable us to navigate the social rapids ahead. John O. McGinnis demonstrates how these new technologies combine to address a problem as old as democracy itself: how to help citizens better evaluate the consequences of their political choices. As society became more complex in the nineteenth century social planning became a top-down enterprise delegated to experts and bureaucrats. Today technology increasingly permits information to bubble up from below and filter through more dispersed and competitive sources. McGinnis explains how to use fast-evolving information technologies to more effectively analyze past public policy, bring unprecedented intensity of scrutiny to current policy proposals, and more accurately predict the results of future policy. But he argues that we can do so only if government keeps pace with technological change. For instance, it must revive federalism to permit different jurisdictions to test different policies so that their results can be evaluated and it must legalize information markets to permit people to bet on what the consequences of a policy will be even before that policy is implemented. Accelerating Democracy reveals how we can achieve a democracy that is informed by expertise and social scientific knowledge while shedding the arrogance and insularity of a technocracy.

**Political Participation And Institutional Innovation: A Case Study Of Zhejiang** Shengyong Chen, Dongsheng Zhong, Xingzhi Wu, Bingxuan Zhang, 2020-03-19 The participation of citizens in democratic politics serves as an indicator to measure a country's development, its political modernization and political civilization. To promote citizens' political participation, it is important to have them participate extensively in local governance and exercise their constitutional rights. This book analyses Zhejiang's experience in democratic consultation, hearing people's proposal solicitation system, television and Internet political consultation, official and citizen dialogue on government websites. It studies how common people can actively participate in politics and manage the public affairs of the country through institutionalized ways and means.

**Digitalization and the Welfare State** Marius R. Busemeyer, Achim Kemmerling, Kees Van Kersbergen, Paul Marx, 2022 This volume explores how digitalization in different forms affects the welfare state. Digitalization is likely to have a lasting impact on work welfare and the distribution of income. The volume studies how digitalization affects policies as well as the underlying power relationship between actors, i.e. the politics of the welfare state.

**Future Politics** Jamie Susskind, 2018-09-12 Future Politics confronts one of the most important questions of our time: how will digital technology transform politics and society? The great political debate of the last century was about how much of our

collective life should be determined by the state and what should be left to the market and civil society In the future the question will be how far our lives should be directed and controlled by powerful digital systems and on what terms Jamie Susskind argues that rapid and relentless innovation in a range of technologies from artificial intelligence to virtual reality will transform the way we live together Calling for a fundamental change in the way we think about politics he describes a world in which certain technologies and platforms and those who control them come to hold great power over us Some will gather data about our lives causing us to avoid conduct perceived as shameful sinful or wrong Others will filter our perception of the world choosing what we know shaping what we think affecting how we feel and guiding how we act Still others will force us to behave certain ways like self driving cars that refuse to drive over the speed limit Those who control these technologies usually big tech firms and the state will increasingly control us They will set the limits of our liberty decreeing what we may do and what is forbidden Their algorithms will resolve vital questions of social justice allocating social goods and sorting us into hierarchies of status and esteem They will decide the future of democracy causing it to flourish or decay A groundbreaking work of political analysis Future Politics challenges readers to rethink what it means to be free or equal what it means to have power or property what it means for a political system to be just or democratic and proposes ways in which we can and must regain control
