The Prize Dale Russakoff,2015-09-08 This

New York Times bestseller chronicles how Mark Zuckerberg Chris Christie and Cory Booker tried and failed to reform education in Newark NJ In September of 2010 billionaire Facebook founder Mark Zuckerberg went on Oprah to announce a pledge of 100 million to transform the downtrodden schools of Newark New Jersey There by his side were the city s Democratic mayor Cory Booker and the state s Republican governor Chris Christie Together they vowed to make Newark a symbol of educational excellence for the whole nation But this trio of power players had no idea what they were in for The tumultuous changes planned by reformers and their highly paid consultants spark a fiery grass roots opposition stoked by local politicians and union leaders At the center of the fight was Newark s billion dollar a year education budget a prize that

for generations had enriched seemingly everyone except Newark's children. In *The Prize* Dale Russakoff presents a dramatic narrative encompassing the rise of celebrity politics, big philanthropy, extreme economic inequality, the charter school movement and the struggles and triumphs of schools in one of the nation's poorest cities. One of the most important books on education to come along in years. *The New York Times* **Mass Transit**, 2002 **Solar, Wind and Land** Troy A. Rule, 2014-09-19

The global demand for clean renewable energy has rapidly expanded in recent years and will likely continue to escalate in the decades to come. Wind and solar energy systems often require large quantities of land and airspace so their growing presence is generating a diverse array of new and challenging land use conflicts. Wind turbines can create noise, disrupt views or radar systems and threaten bird populations. Solar energy projects can cause glare effects, impact pristine wilderness areas and deplete water resources. Developers must successfully navigate through these and myriad other land use conflicts to complete any renewable energy project. Policymakers are increasingly confronted with disputes over these issues and are searching for rules to effectively govern them. Tailoring innovative policies to address the unique conflicts that arise in the context of renewable energy development is crucial to ensuring that the law facilitates rather than impedes the continued growth of this important industry. This book describes and analyses the property and land use policy questions that most commonly arise in renewable energy development. Although it focuses primarily on issues that have arisen within the United States, the book's discussions of international policy differences and critiques of existing approaches make it a valuable resource for anyone exploring these issues in a professional setting anywhere in the world. **Brill's Content**, 2001

EBOOK: Operations Management 2/e PATON, 2020-12-03 **EBOOK Operations Management** 2 e **Andy Grove** Richard S. Tedlow, 2007. Brilliant, brave and willing to defy conventional wisdom, Andy Grove, the CEO of Intel during its years of explosive growth, is on the shortlist of America's most admired businesspeople. Grove gave Tedlow unprecedented access to his private papers along with wide ranging interviews and access to friends and key business associates. The result is not just a life story but a fascinating analysis of how Grove attacks problems. Born a Hungarian Jew in 1936, András István Gróf survived the Nazis only to face the Soviet invasion of his country. He fled to America at age twenty, studied engineering and arrived in Silicon Valley just in time to become the third employee of Intel. As talented as he was as an engineer, Grove became an even better manager. Tedlow shows us exactly how the penniless immigrant taught himself to lead a major corporation through some of the toughest challenges in the history of business. From publisher description.
