Interests And Institutions Substance And Structure In American Politics:

Interests and Institutions Robert H. Salisbury, 1992-10-15 Interest and Institutions is a collection of essays written by distinguished political scientist Robert Salisbury, a leading analyst of interest group politics. He offers his theories on the workings and influence of groups, organizations, and individuals in many different areas of American politics. **The Organization Ecology of Interest Communities** Darren Halpin, David Lowery, Virginia Gray, 2016-04-29 This volume summarizes the origins and development of the organization ecology approach to the study of interest representation and lobbying and outlines an agenda for future research. Multiple authors from different countries and from different perspectives contribute their analysis of this research program. **Democracy and Interest Groups** G. Jordan, W. Maloney, 2007-08-24 Democracy and Interest Groups assesses the contribution that interest groups make to the democratic involvement of citizens and the generation of social capital. The authors draw on new surveys of groups and members and more unusually with non-participants. It also makes use of in-depth interviews with campaign group leaders and organizers. Lobbying in America Ronald J. Hrebenar, Bryson B. Morgan, 2009-03-03 A comprehensive presentation of the way lobbying and interest-based political activism works in the United States. Lobbying in America: A Reference Handbook offers readers an insightful survey of interest group politics in the United States: the strategies, techniques, and impact, both positive and negative. Written by one of the nation's premier scholars on the subject, it reveals the inner workings of the lobbying process like no other volume before it. Lobbying in America traces the growth of interest groups from the nation's infancy to the present. The book examines a range of related issues and controversies, including infamous scandals, attempts to regulate lobbying, and the overriding constitutional question of whether limiting money in politics is an infringement of free speech. Comparisons to lobbying systems in other countries, as well as listings of key organizations and an extensive bibliography, round out a volume that could not be more timely. *The Population Ecology of Interest Representation* Virginia Gray, David Lowery, 1996 This examination of lobbying communities explores how interest group populations are constructed and how they influence politics and public policy. By examining how populations of interest groups are comprised, this work fills an important gap between existing theories of the origins of individual interest groups and studies of interest group influence. The population ecology model of interest communities developed here builds on insights first developed in population biology and later employed by organizational ecologists. The model's central premise is that it is the environmental forces confronting interest organizations that most directly shape the contours of interest populations. After examining the demography of interest organizations in the fifty American states, the population ecology model is used to account for variations in the density and diversity of their interest communities, the nature of competition among similar interest organizations to establish viable niches, and the impact of alternative configurations of interest communities on the legislative process and the policies it produces. These empirical findings suggest that the environment of interest communities is highly constraining, limiting their

size composition and potential impact on politics Virginia Gray is Professor of Political Science University of Minnesota David Lowery is Burton Craige Professor of Political Science University of North Carolina at Chapel Hill

The Not-So-Special Interests Matt Grossmann, 2012-04-11 Lobbyist tends to be used as a dirty word in politics Indeed during the 2008 presidential primary campaign Hillary Clinton was derided for even suggesting that some lobbyists represent real Americans But although many popular commentators position interest groups as representatives of special not public interests much organized advocacy is designed to advance public interests and ideas Advocacy organizations more than 1 600 of them are now an important component of national political institutions This book uses original data to explain why certain public groups such as Jews lawyers and gun owners develop substantially more representation than others and why certain organizations become the presumed spokespersons for these groups in government and media In contrast to established theory and conventional wisdom this book demonstrates that groups of all sizes and types generate advocates to speak on their behalf though with varying levels of success Matt Grossmann finds that the advantages of organized representation accrue to those public groups that are the most politically motivated and involved in their communities Organizations that mobilize members and create a long lasting presence in Washington become in the minds of policymakers and reporters the taken for granted surrogates for these public groups In the face of perennial debates about the relative power of the people and the special interests Grossmann offers an informed and nuanced view of the role of organizations in public representation and American governance
