[Technical Analysis of Stocks and Commodities](#), 2007 **Unlocking Financial Data** Justin Pauley, 2017-10-06 Investors recognize that technology is a powerful tool for obtaining and interpreting financial data that could give them the one thing everyone on Wall Street wants an edge. Yet many don't realize that you don't need to be a programmer to access behind the scenes financial information from Bloomberg IHS Markit or other systems found at most banks and investment firms. This practical guide teaches analysts a useful subset of Excel skills that will enable them to access and interpret financial information without any prior programming experience. This book will show analysts step by step how to quickly produce professional reports that combine their views with Bloomberg or Markit data including historical financials comparative analysis and relative value. For portfolio managers this book demonstrates how to create professional summary reports that contain a high level view of a portfolio's performance growth risk adjusted return and composition. If you are a programmer this book also contains a parallel path that covers the same topics using C. Topics include Access additional data that isn't visible on Bloomberg screens Create tables containing corporate data that makes it possible to compare multiple companies bonds or loans side by side Build one page analytic Tear Sheet reports for individual companies that incorporates important financials custom notes relative value comparison of the company to its peers and price trends with research analyst targets Build two page portfolio summary report that contains a high level view of the portfolio's performance growth
