**Handlungsmacht, Widerständigkeit und kulturelle Ordnungen** Markus Tauschek, 2017 Handlungsmacht Widerstand kulturelle Ordnungen mit diesem Dreiklang formuliert der Sammelband ein kulturwissenschaftliches Forschungsprogramm wie es für eine historisch und empirisch ethnografisch ausgerichtete Kulturanalyse und Alltagsforschung kennzeichnend ist. Die Beiträge befassen sich in exemplarischen Feldern vom Kochbuch über Landlichkeit vom Geldflischen bis hin zu Protesten und urbanen Wohnraumpolitiken mit kulturellen Ordnungen auf der einen Seite und mit subversiven widerständigen oder kreativen Formen der Aneignung auf der anderen Seite. Die Fallstudien des Bandes fokussieren dabei die unterschiedlichsten Formen von Handlungsmacht denen das Potenzial innewohnt kulturelle Ordnungsmuster in Frage zu stellen aufzubrechen oder zu transformieren

### **History of Plant Breeding**

Rolf H. J. Schlegel, 2017-12-15 While there has been great progress in the development of plant breeding over the last decade, the selection of suitable plants for human consumption began over 13 000 years ago. Since the Neolithic era, the cultivation of plants has progressed in Asia Minor, Asia, Europe and ancient America, each specific to the locally wild plants as well as the ecological and social conditions. A handy reference for knowing our past, understanding the present and creating the future, this book provides a comprehensive treatment of the development of crop improvement methods over the centuries. It features an extensive historical treatment of development, including influential individuals in the field, plant cultivation in various regions, techniques used in the Old World and cropping in ancient America. The advances of scientific plant breeding in the twentieth century are extensively explored, including efficient selection methods, hybrid breeding, induced polyploidy, mutation research, biotechnology and genetic manipulation. Finally, this book presents information on approaches to the sustainability of breeding and to cope with climatic changes as well as the growing world population

Multispecies Storytelling in Intermedial Practices Ida Bencke, Jørgen Bruhn, 2022-03-08 Multispecies Storytelling in Intermedial Practices is a speculative endeavor asking how we may represent, relay and read worlds differently by seeing other species as protagonists in their own rights. What other stories are to be invented and told from within those many

tongued chatters of multispecies collectives Could such stories teach us how to become human otherwise Often the human is defined as the sole creature who holds language and consequently is capable of articulating representing and reflecting upon the world And yet the world is made and remade by ongoing and many tongued conversations between various organisms reverberating with sound movement gestures hormones and electrical signals Everywhere life is making itself known heard and understood in a wide variety of media and modalities Some of these registers are available to our human senses while some are not Facing a not so distant future catastrophe which in many ways and for many of us is already here it is becoming painstakingly clear that our imaginaries are in dire need of corrections and replacements How do we cultivate and share other kinds of stories and visions of the world that may hold promises of modest yet radical hope If we keep reproducing the same kind of languages the same kinds of scientific gatekeeping the same kinds of stories about our place in nature we remain numb in the face of collapse Multispecies Storytelling in Intermedial Practices offers steps toward a self critical multispecies philosophy which interrogates and qualifies the broad and seemingly neutral concept of humanity utilized in and around conversations grounded within Western science and academia Artists activists writers and scientists give a myriad of different interpretations of how to tell our worlds using different media and possibly gives hints as to how to change it too
