## **Adobe Scripting Guide:**

**Adobe After Effects Scripting Guide** Nathan CLARK, 2018-12-07 This Book Is To Learn A script is a series of commands that tells an application to perform a series of operations You can use scripts in most Adobe applications to automate repetitive tasks perform complex calculations and even use some functionality not directly exposed through the graphical user interface For example you can direct After Effects to reorder the layers in a composition find and replace source text in text layers or send an e mail message when rendering is complete Although both the After Effects expressions language and the After Effects ExtendScript scripting language are based on JavaScript the expressions features and scripting features of After Effects are separate and distinct Expressions cannot access information from scripts such as variables and functions Whereas a script tells an application to do something an expression says that a property is something However because the After Effects expression language and ExtendScript are both based on JavaScript familiarity with either one is very helpful in understanding the other The heart of a scriptable application is the object model When you use Adobe After Effects you create projects compositions and render queue items along with all of the elements that they contain footage images solids layers masks effects and properties Each of these items in scripting terms is an object This guide describes the ExtendScript objects that have been defined for After Effects projects

**Adobe Indesign CS4 Scripting Guide: Javascript , Adobe After Effects Cc Full Scripting Guide** J. O. E. WILLIAMSON, 2018-07-02 Learn After Effects Scripts After Effects scripts are coded tools to automate processes that would be too tedious to do manually such as bulk renaming layers shifting certain shape layers importing text from a spreadsheet file or organizing your project structure In essence scripts can do the manual tasks you can do except faster It cannot do things you cannot do yourself plugins which are basically individual software within After Effects can do this In this article I will point you to all the resources you ll need to get started with scripting for Adobe products specifically After Effects scripting without having any knowledge of programming so the learning curve was pretty steep If you re familiar with programming at all even if you ve taken a single intro course in school you should be more than sufficient Adobe apps use a language called ExtendScript which is just a modified version of JavaScript so if you re into web development you should feel right at home The process is not that vigorous once you have the fundamental programming concepts down like arrays objects functions recursions etc Best of luck on your scripting adventures After Effects scripts like expressions can be intimidating The code nature of these functions is often enough to make creative professionals shy away I m a motion designer not a programmer but don t be afraid When you start to understand the fundamentals of scripts in After Effects you ll see that it s not as complicated as you may have assumed This BOOK will help get you started
