## Historic Roads:

**Saving Historic Roads** Paul Daniel Marriott,1998 Keep them safe but keep them The destruction of historic roads to comply with current highway safety practices has been undertaken with little regard for preservation options In Saving Historic Roads Paul Daniel Marriott examines the complex issues surrounding historic roads and provides design and policy guidelines for adapting contemporary transportation laws and engineering practices to these resources Recognizing the importance of eliminating highway hazards he offers strategies demonstrating that modern highway safety and historic preservation are not mutually exclusive This indispensable resource Defines criteria for evaluating a road s historic significance Identifies effective preservation strategies Explains transportation policy and laws Recommends specific steps advocates can take to initiate promote and implement a highway preservation program Defines terms specific to engineering and highway design Features case studies of successful preservation projects Saving Historic Roads is essential for transportation engineers and planners government resource managers policymakers and anyone interested in preserving our nation s historic roads

Miller,2019 Historic roads those eligible for or listed on the National Register of Historic Places may require special planning design and management considerations so as to avoid negative effects on their significant elements This study identified various issues that can affect historic roads Drawing on this information the study identified appropriate considerations for management of historic roads These include documentation considerations for planning for repair and improvement design and maintenance practices that can be used for advance planning purposes and will not adversely affect a road s elements of historic integrity Because historic roads can feature a wide variety of types and significant elements a document such as this report can be particularly useful in cultural resource review relating to

transportation issues For this reason this study was both identified as an important need and requested by cultural resource personnel of the Virginia Department of Transportation VDOT Major conclusions of the study include the following 1 the history needs and condition of any historic road are unique and need to be considered as such in planning and management 2 accurate documentation of the history construction and changes over time to an historic road is vital to planning any project involving such a road 3 various elements history historic structures and related cultural resources changes to the road associated landscapes current condition current stakeholder input and current transportation needs must be considered when project planning involves historic roads 4 it is feasible to identify and explore maintenance practices that will not overly change the appearance of historic roads or affect their historic significance but rather will improve the maintenance and safety of the roadways and 5 appropriate actions and treatments for historic roads and roadside elements may differ from modern aesthetics The study also included case studies of two roads in Virginia for which maintenance and repair improvement design practices had become issues 1 a road listed on the National Register of Historic Places and 2 a road eligible for the National Register of Historic Places Study recommendations include 1 coordination between VDOT s Environmental Division and other appropriate VDOT divisions depending on project scope of activities that might have an effect on the character defining features of an historic road for which a project is being developed and 2 documentation of the earlier original appearance s and changes to an historic road in order to have the most accurate information for planning purposes when a project involving that road is being developed
